**The Narrative Arts of Tianjin: Between Music and Language** Francesca R. Sborgi Lawson 2016-12-05 In studying one of the world's oldest and most enduring musical cultures, academics have consistently missed one of the richest forms of Chinese cultural expression: performed narratives. Francesca R. Sborgi Lawson explores the relationships between language and music in the performance of four narrative genres in the city of Tianjin, China, based upon original field research conducted in the People's Republic of China in the mid 1980s and in 1991. The author emphasizes the unique nature of oral performances in China: these genres are both musical and literary and yet are considered to be neither music nor literature. Lawson employs extensive examples of the complex interaction of music and language in each genre, all the while relating those

analyses to broader cultural issues and to patterns of social relationships. The narrative arts known as shuochang (speaking-singing) are depicted as genres that constitute a unique communicative discourse—the communication of stories in song. The genres subsumed under the native conception of shuochang include Tianjin Popular Tunes, Beijing Drumsong, Clappertales and Comic Routines. The maximum utilization of shuo (speaking) and chang (singing) in all their varying manifestations constitutes the vitality of the traditional narrative arts in the city of Tianjin—the center for these arts in North China. The variety of narrative forms provides entertainment for audiences representing all social strata of Chinese society. The author argues that Chinese narrative traditions represent a foundation from which certain Chinese literary and operatic traditions have borrowed, such as how the novels from the Ming-Qing period draw on the performed narrative arts both in style and in content. Hence, an understanding of performed narratives is not only useful to scholars in Chinese literature and music, but also to scholars interested in broadening their understanding of China generally.

*Kendo* Alexander C. Bennett 2015-07-31 Kendo is the first in-depth historical, cultural, and political account in English of the Japanese martial art of swordsmanship, from its beginnings in military training and arcane medieval schools to its widespread practice as a global sport today. Alexander Bennett shows how kendo evolved through a recurring process of "inventing tradition," which served the changing ideologies and needs of Japanese warriors and governments over the course of history. Kendo follows the development of Japanese swordsmanship from the aristocratic-aesthetic pretensions of medieval warriors in the Muromachi period, to the samurai elitism of the Edo regime, and then to the nostalgic patriotism of the Meiji state. Kendo was later influenced in the 1930s and 1940s by ultranationalist militarists and ultimately by the postwar government, which sought a gentler form of nationalism to rekindle appreciation of traditional culture among Japan's youth and to garner international prestige as an instrument of "soft power." Today kendo is becoming increasingly popular internationally. But even as new organizations and clubs form around the world, cultural exclusiveness continues to play a role in kendo's ongoing evolution, as the sport remains closely linked to Japan's sense of collective identity.

*The Sound State of Uzbekistan* Kerstin Klenke 2019-05-06 *The Sound State of Uzbekistan: Popular Music and Politics in the Karimov Era* is a pioneering study of the intersection between popular music and state politics in Central Asia. Based on 20 months of fieldwork and archival research in Tashkent, this book explores a remarkable era in Uzbekistan's politics (2001–2016), when the Uzbek government promoted a rather unlikely candidate to the prominent position of state sound: estrada, a genre of popular music and a musical relic of socialism. The political importance it attached to estrada was matched by the establishment of an elaborate bureaucratic apparatus for state oversight. *The Sound State of Uzbekistan* shows the continuing legacy of Soviet concepts to frame the nexus between music, artists and the state, and explains the extraordinary potency ascribed to estrada. At the same time, it challenges classical readings of transition and also questions common binary models for researching culture in totalitarian or authoritarian states. Proposing to approach lives in music under authoritarianism as a form of normality instead, the author promotes a post-Cold War paradigm in music studies.

**God and Karate on the Southside** Joseph E. Yi 2009-06-16 Recent demographic changes have sparked debate about the civic health of American democracy. Democracy requires people of different backgrounds to be disposed toward working together, and it requires 'little-noticed meeting places' where neighbors interact with each other, share their thinking, and address common problems. As issues of ethnic and social diversity become increasingly foregrounded, social scientists find pervasive social distrust and civic withdrawal in racially and ethnically heterogeneous communities, whether in big cities (Los Angeles) or small (Yakima, WA). In this book, Yi argues that

increasing diversity can revitalize social and civic connectedness if our institutions rise up to the challenge of finding common ground and shared enterprise for people of different backgrounds. He highlights two types of organizational actors in the USA. One type renews and adapts longstanding religious, cultural, and civic traditions to a dynamic, multiethnic society. The second type attempts to introduce Americans to the many religious and cultural traditions from outside the United States. These tendencies point to a dynamic, 'many-stranded' model of liberal-plural democracy, which fosters and benefits from a variety of group affiliations and types of engagement. Organizations that combine internal, authoritative community with external, plural outreach, such as some evangelical mega-churches and karate schools, connect people across racial and economic divides. In these bridging organizations, people find a sense of unity among diversity; they get to know each other as individuals, rather than as representatives of disliked groups. Using fieldwork on churches, karate schools, and other organizations in a racially mixed, Chicago Southside neighborhood as well as a broader analysis of race and religion in the 1972D1998 General Social Survey, Yi combines classical democratic theory with compelling personal stories and rigorous empirical analysis. *God and Karate in the Southside* is the first book to analyze the intersection between race, religion, and martial arts in the United States. It is a mustDread for scholars interested in issues of community diversity and civic democracy.
