Civil Procedure Stories Kevin M. Clermont 2008 This book is a collaborative effort by fourteen law-school professors to provide a deeper understanding of the great civil procedure cases. The professors each wrote a short chapter on one of the cases, retelling the cases in their own voice and by their own method. Each chapter has a fairly consistent structure, with separate sections on: social and legal background of the case; factual background of the case; lower court proceedings in the case; final appellate disposition, including issues, decisions, reasons, and separate opinions; factual postscript to the case; immediate impact of the case on the development of the law (why the case is famous and when it became so); and continuing importance of the case today (why it is still a leading case).The accompanying website, <http://civprostories.law.cornell.edu>, serves as a research tool for students, academics, and practitioners. The Big Reset Willem Middelkoop 2016 Amid the turmoil in the Eurozone, economic problems in Russia, stagnation in Japan, and rumblings that China may slip into recession, the one reliable asset is the American dollar. While it may encounter ups and downs, investors for decades have been confident that it will never lose a substantial part of its value. That may be about to change. In *The Big Reset*, Willem Middelkoop lays out the case for an inevitable monetary reset, one that will be designed to keep the United States in the driver's seat, but will include strong roles for the Euro and China's Renminbi--and, crucially, gold. This fully revised edition of Middelkoop's book takes into account developments since its original publication, which have only strengthened the case for the coming return of gold.

Remediation in Medical Education Adina Kalet 2013-11-26 Remediation in medical education is the act of facilitating a correction for trainees who started out on the journey toward becoming excellent physicians but have moved off course. This book offers an evidence-based and practical approach to the identification and remediation of medical trainees who are unable to perform to standards. As assessment of clinical competence and professionalism has become more sophisticated and ubiquitous, medical educators

increasingly face the challenge of implementing effective and respectful means to work with trainees who do not yet meet expectations of the profession and society. Remediation in Medical Education: A Mid-Course Correction describes practical stepwise approaches to remediate struggling learners in fundamental medical competencies; discusses methods used to define competencies and the science underlying the fundamental shift in the delivery and assessment of medical education; explores themes that provide context for remediation, including professional identity formation and moral reasoning, verbal and nonverbal learning disabilities, attention deficit disorders in high-functioning individuals, diversity, and educational and psychiatric topics; and reviews system issues involved in remediation, including policy and leadership challenges and faculty development.

The Death of the Irreparable Injury Rule Douglas Laycock 1991 The irreparable injury rule says that courts will not grant an equitable remedy to prevent harm if it would be adequate to let the harm happen and grant the legal remedy of money damages. After surveying more than 1400 cases, Laycock concludes that this ancient rule is dead--that it almost never affects the results of cases. When a court denies equitable relief, its real reasons are derived from the interests of defendants or the legal system, and not from the adequacy of the plaintiff's legal remedy. Laycock seeks to complete the assimilation of equity, showing that the law-equity distinction survives only as a proxy for other, more functional distinctions. Analyzing the real rules for choosing remedies in terms of these functional distinctions, he clarifies the entire law of remedies, from grand theory down to the practical details of specific cases. He shows that there is no positive law support for the most important applications of the legal-economic theory of efficient breach of contract. Included are extensive notes and a detailed table of cases arranged by jurisdiction.

Preserving Liberty Candice Patterson 2017-09-08 Historic preservation specialist Liberty Carmichael loves her position at the Library of Congress, caring for America's oldest documents. So when she intercepts an inside threat by a radical group planning to steal part of Thomas Jefferson's original collection, she takes it to the highest authority--her father, the president. When he fails to take the threat seriously, she steals the books to keep them safe. Undercover FBI agent Cole Harding is close to disbanding the group responsible for killing his father. Believing documents once owned by Thomas Jefferson hold clues to answering a two hundred year old question, the group's next target is the Library of Congress. However, he wasn't expecting the First Daughter to get caught in the middle. Will Cole convince the president to trust his abilities? Can he keep Liberty safe without blowing his cover? Fair Housing Act Design Manual U.S. Department of Housing and Urban Development 2005 The Fair Housing Act Design Manual: A Manual to Assist Designers and Builders in Meeting the Accessibility Requirements of The Fair Housing Act provides clear and helpful guidance about ways to design and construct housing which complies with the Fair Housing Act. The manual provides direct information about the accessibility requirements of the Act, which must be incorporated into the design, and construction of multifamily housing covered by the Act. It carries out two statutory responsibilities: (1) to provide clear statement of HUD's interpretation of the accessibility requirements of the Act so that readers may know what actions on their part will provide them with a "safe harbor"; and (2) to provide guidance in the form of recommendations which, although not binding meet the Department's obligation to provide technical assistance on alternative accessibility approaches which will comply with the Act, but may exceed its minimal requirements. The latter information allows housing providers to choose among alternative and also provides persons with disabilities with information on accessible design approaches. The Manual clarifies what are requirements under the Act and what are HUD's technical assistance recommendations. The portions describing the requirements are clearly differentiated from the technical assistance recommendations.

Observing the Observer Zahid Bukhari 2012 THE collection of papers in this volume documents the study of Islam in American Universities. Over the last few decades the United States has seen significant growth in the study of Islam and Islamic societies in institutions of higher learning fueled primarily by events including economic relations of the U.S. with Muslim

countries, migration of Muslims into the country, conversion of Americans to Islam, U.S. interests in Arab oil resources, involvement of Muslims in the American public square, and the tragic events of 9/11. Although there is increasing recognition that the study of Islam and the role of Muslims is strategically essential in a climate of global integration, multiculturalism, and political turmoil, nevertheless, the state of Islamic Studies in America is far from satisfactory. The issue needs to be addressed, particularly as the need for intelligent debate and understanding is continuously stifled by what some have termed an “Islam industry” run primarily by fly-by journalists, think tank pundits, and cut-and-paste “experts.”
