Learning, Teaching, and Musical Identity Lucy Green 2011 Musical identity raises complex, multifarious, and fascinating questions. Discussions in this new study consider how individuals construct their musical identities in relation to their experiences of formal and informal music teaching and learning. Each chapter features a different case study situated in a specific national or local socio-musical context, spanning 20 regions across the world. Subjects range from Ghanaian or Balinese villagers, festival-goers in Lapland, and children in a South African township to North American and British students, adults and children in a Cretan brass band, and Gujerati barbers in the Indian diaspora.

CHOCOLATE Sandra Boynton 2015-10-06 Wait. Sandra Boynton wrote a book about CHOCOLATE? For grown-ups? Oh YES! Boynton's beloved classic returns, updated and redrawn by her for a whole new generation of chocophiles. In addition to her extensive new research, Boynton also nobly sourced and consumed untold quantities of great chocolate, with no thought for her own personal safety. Lavishly illustrated and filled with useful facts and cheerful misinformation, *CHOCOLATE: The Consuming Passion* is the absolute ideal gift for every true chocolate obsessive. Discover the many faces of chocolate—milk chocolate, dark chocolate, boxed chocolates, pretend chocolate, and the wild new frontier of small-batch craft chocolate. Learn about chocolate's complex effects on the body, the psyche, and the soul. Prepare select simple recipes, such as "Hippo Pot de Mousse." Learn how to grow your own chocolate, assuming you don't mind relocating to within 15° of the Equator. There's even a handy guide to saying "Excuse me, where is the nearest chocolate?" in eleven languages, including Klingon. (Nook-dock YOOCH dah-PULL?) Boldly go.

Musical Creativity: Insights from Music Education Research Dr Oscar Odena 2013-01-28 How do we develop musical creativity? How is musical creativity nurtured in collaborative improvisation? How is it used as a communicative tool in music therapy? This comprehensive volume offers new research on these questions by an international team of experts from the fields of music education, music psychology and music therapy. The book celebrates the rich diversity of ways in which learners of all ages develop and use musical creativity. Contributions focus broadly on the composition/improvisation process, considering its conceptualization and practices in a number of contexts. The authors examine how musical creativity can be fostered in formal settings, drawing examples from primary and secondary schools, studio, conservatoire and university settings, as well as specialist music schools and music therapy sessions. These essays will inspire readers to think deeply about musical creativity and its development. The book will be of crucial interest to music educators, policy makers, researchers and students, as it draws on

applied research from across the globe, promoting coherent and symbiotic links between education, music and psychology research.

Perception, Interaction and Language Felicie D. Affolter 2011-12-21 Perception, Interaction and Language is essentially about the nature of adaptive learning in both its normal and abnormal forms. A major premise is that verbal and nonverbal learning depend critically on interaction with the environment via daily life problem solving activity. This new perspective is not entirely unfamiliar. But, a fundamentally new perspective is offered by the additional premise that tactile-kinesthetic perception associated with problem solving experiences provides the primary basis for interaction and hence, is the root of adaptive learning and development. Although decades have passed since Jean Piaget first proposed a model of cognitive learning and development that builds on sensorimotor processes, little seems to be known about how human actions are actually translated into adaptive behavior. We are keenly reminded of this lack of knowledge when dealing with persons who present abnormal performance. The failure to learn language, in particular, can create a devastating handicap. Therefore, it is not surprising that systematic attention has been given to research and clinical programs for the language disordered.

How Popular Musicians Learn Lucy Green 2017-03-02 Popular musicians acquire some or all of their skills and knowledge informally, outside school or university, and with little help from trained instrumental teachers. How do they go about this process? Despite the fact that popular music has recently entered formal music education, we have as yet a limited understanding of the learning practices adopted by its musicians. Nor do we know why so many popular musicians in the past turned away from music education, or how young popular musicians today are responding to it. Drawing on a series of interviews with musicians aged between fifteen and fifty, Lucy Green explores the nature of pop musicians' informal learning practices, attitudes and values, the extent to which these altered over the last forty years, and the experiences of the musicians in formal music education. Through a comparison of the characteristics of informal pop music learning with those of more formal music education, the book offers insights into how we might re-invigorate the musical involvement of the population. Could the creation of a teaching culture that recognizes and rewards aural imitation, improvisation and experimentation, as well as commitment and passion, encourage more people to make music? Since the hardback publication of this book in 2001, the author has explored many of its themes through practical work in school classrooms. Her follow-up book, *Music,*
