Mixed Messages: Materiality, Textuality, Missions J. Scott 2005-05-05 This collection of essays looks at missions, their complicity in European colonialism, and their postcolonial aftermath. It examines the spread of Christianity, ranging over the anthropological, textual, historical, and geographical dimensions of mission enterprises, with topics as diverse as the influence of mission printing and record-keeping on traditional life in Africa to the role of missions in changing styles of dress in India. Also, uniquely, the collection includes essays analyzing the role of proselytizing in Islam, Hinduism, and Buddhism, as well as American liberal democratic capitalism. The volume is interdisciplinary, focusing on textual and material aspects of missions. Like Griffiths' earlier ground-breaking books in postcolonial studies, and Scott's well-known interdisciplinary work on missions and postcolonial literatures, this collection will be fascinating to scholars in postcolonial/cultural and mission studies and be useful as a teaching tool as well. *Mixed Messages* was listed among the 15 best books for 2005 in the Jan 2006 issue of *The International Bulletin of Mission Studies* .

Persuading People Robert Cockcroft 2013-12-01 This fascinating and practical book explores persuasive techniques in the English language, and is the ideal introduction for students and others with a professional interest in persuasion. Using a wide range of lively and accessible illustrative material, Robert Cockcroft and Susan Cockcroft unpick the complexities of persuasive language - both written and spoken - and enable readers to develop and enhance their rhetorical skills. Now thoroughly revised and expanded, the second edition of this successful text includes: - Developed application of cognitive

linguistic theory, which sheds new light on the emotional and logical powers of persuasion - Extended and updated examples of rhetoric in action - Clear pointers for further study to allow readers to continue their exploration into rhetorical theory and practice - A new final chapter which invites readers to practice their skills using updated versions of traditional rhetorical exercises

Coasting Casey Shannon Anderson 2016-08-10 "My teachers say I'm coasting, that I just do 'well enough.' But why do I want to waste my time on super boring stuff?" Casey is bright, but doesn't apply himself at school. Instead, he coasts—doing just well enough to get by, and ignoring homework and projects that don't interest him. What does interest Casey is art. He loves to draw, make music, and create. Sometimes this enthusiasm interferes with learning and gets him into trouble. With help from his school principal, Casey learns to apply his passions to his schoolwork. Told in humorous rhyme, this lively story will speak to bored students and to any kid who can—and wants to—do better. The book concludes with tips and information to help parents, teachers, counselors, and other adults foster dialogue with any kid wrestling with underachievement.

Modern Studies in Property Law Heather Conway 2017-07-27 This book contains a collection of peer-reviewed papers presented at the Eleventh Biennial Modern Studies in Property Law Conference held at Queen's University Belfast in April 2016. It is the ninth volume to be published under the name of the Conference. The Conference and its published proceedings have become an established forum for property lawyers from around the world to showcase current research in the discipline. This collection reflects the diversity and contemporary relevance of modern research in property law. Following a foreword from the keynote speaker at the Conference, Queen's alumnus Lord Kerr of Tonaghmore, the chapters address a range of issues, from the nature of land law and property rights, through claims to the home and digital assets, to the growing debate on the nature of public property. Collectively the chapters demonstrate the vibrancy and importance of property law in dealing with modern concerns across the common law world.

Differentiation in the Elementary Grades Kristina J. Doubet 2017-10-16 In this comprehensive resource for elementary school teachers, Kristina J. Doubet and Jessica A. Hockett explore how to use differentiated instruction to help students be more successful learners--regardless of background, native language, learning preference, or motivation. They explain how to * Create a healthy classroom community in which students' unique qualities and needs are as important as the ones they have in common. * Translate curriculum into manageable and meaningful learning goals that are fit to be differentiated. * Use pre-assessment and formative assessment to uncover students' learning needs, tailor tasks accordingly, and ensure that students are "getting it." * Provide interactive learning experiences that encourage students to engage with both the content and one another. * Present students with avenues to take in, process, and produce knowledge that appeal to their varied interests and learning preferences. * Navigate potential roadblocks to differentiation. Each

chapter provides a plethora of practical tools, templates, and strategies for a variety of subject areas developed by and for real teachers. Whether you're new to differentiated instruction or looking to expand your repertoire of DI strategies, *Differentiation in the Elementary Grades* will show you classroom-tested ways to better engage students and help them succeed every day. Includes URL and password for free downloadable forms.

The use of the Internet in instruction is addressed, and exemplary approaches to teaching English-language learners and students with special needs are discussed. The book also offers best-practice guidelines for designing an effective writing program. Focusing on everyday applications of current scientific research, the book features many illustrative case examples and vignettes.

How to Differentiate Instruction in Academically Diverse Classrooms, Third Edition Carol Ann Tomlinson
2017-03-22 We differentiate instruction to honor the reality of the students we teach. They are energetic and outgoing. They are quiet and curious. They are confident and self-doubting. They are interested in a thousand things and deeply immersed in a particular topic. They are academically advanced and “kids in the middle” and struggling due to cognitive, emotional, economic, or sociological challenges. More of them than ever speak a different language at home. They learn at different rates and in different ways. And they all come together in our academically diverse classrooms. Written as a practical guide for teachers, this expanded third edition of Carol Ann Tomlinson’s groundbreaking work covers the fundamentals of differentiation and provides additional guidelines and new strategies for how to go about it. You’ll learn * What differentiation is and why it’s essential * How to set up the flexible and supportive learning environment that promotes success * How to manage a differentiated classroom * How to plan lessons differentiated by readiness, interest, and learning profile * How to differentiate content, process, and products * How to prepare students, parents, and yourself for the

challenge of differentiation First published in 1995 as *How to Differentiate Instruction in Mixed-Ability Classrooms*, this new edition reflects evolving best practices in education, the experiences of practitioners throughout the United States and around the world, and Tomlinson's continuing thinking about how to help each and every student access challenging, high-quality curriculum; engage in meaning-rich learning experiences; and feel at home in a school environment that "fits."

How to Integrate the Curricula Robin J. Fogarty 2009-04-14 This updated resource offers ten models that allow teachers to work together to create learner-centered classrooms by grouping elements from various content areas into a coherent, standards-based curriculum.

The Politics of Knowledge in Education Elizabeth Rata 2012-05-23 This book explores the decline of the teaching of epistemic, conceptual knowledge in schools, its replacement with everyday social knowledge, and its relation to changes in the division of labor within the global economy. It argues that the emphasis on social knowledge in postmodern and social constructionist pedagogy compounds the problem, and examines the consequences of these changes for educational opportunity and democracy itself.

The Passionate Empiricist Marlana Portolano 2009-01-01 Explores John Quincy Adams's oratorical work in support of government-funded science. This book introduces readers to the role that classical oratory played in changing early American attitudes about pure scientific research. Marlana Portolano investigates the impact of John Quincy Adams's oratorical campaigns on the origins of government-funded science in America, with a special focus on his classical theory of rhetorical engagement and civic duty. "In this age where so much government funding of science is based in the military-industrial complex, it is fascinating to look at arguments for and against government funding of science at a time when such funding was not a given." – CHOICE

Conceding Composition Ryan Skinnell 2016-09-01 First-year composition became the most common course in American higher education not because it could “fix” underprepared student writers, but because it has historically served significant institutional interests. That is, it can be “conceded” in multiple ways to help institutions solve political, promotional, and financial problems. *Conceding Composition* is a wide-ranging historical examination of composition’s evolving institutional value in American higher education over the course of nearly a century. Based on extensive archival research conducted at six American universities and using the specific cases of institutional mission, regional accreditation, and federal funding, this study demonstrates that administrators and faculty have introduced, reformed, maintained, threatened, or eliminated composition as part of negotiations related to nondisciplinary institutional exigencies. Viewing composition from this perspective, author Ryan Skinnell raises new questions about why composition exists in the university, how it exists, and how teachers and scholars might productively reconceive first-year composition in light of its institutional functions. The book considers the rhetorical, political, organizational, institutional, and promotional options conceding composition opened up for institutions of higher education and considers what the first-year course and the discipline might look like with composition’s transience reimaged not as a barrier but as a consummate institutional value.

The Force of Fantasy Ernest G. Bormann 2001 In this work, Ernest G. Bormann explores mass persuasion in America from 1620 to 1860. He examines four rhetorical communities: the revivals of 1739-1740; the hot gospel of the post-revolutionary period; the evangelical revival and reform of the 1830s; and the Free Soil and Republican parties.

Changing the Way You Teach, Improving the Way Students Learn Giselle Martin-Kniep 2009-05-15 With classroom-tested ideas, real-world examples, and easy-to-use activities, Giselle Martin-Kniep and Joanne Picone-Zocchia tap three decades of experience to define and describe critical teaching and learning strategies that engage students and increase achievement. Teachers at any grade level and in any subject area will gain insights into how to * Create a rigorous, relevant, and authentic curriculum; * Use organizing centers and make meaningful connections to lend true coherence to subject matter; * Ask students questions that will help them retain new material and apply their knowledge in settings outside school; * Teach students how to develop high-order skills such as an ability to affirm values, articulate beliefs, and use multiple resources in varied contexts; * Use assessment as a system to directly engage students in revising tests and evaluating themselves; * Incorporate evaluation tools like portfolios, checklists, and rubrics to foster and assess high-quality student work that exceeds expectations; and * Encourage students to self-monitor progress, self-regulate behavior, appreciate unique learning preferences, and, ultimately, become informed and active 21st century citizens. *Changing the Way You Teach, Improving the Way Students Learn* stresses the need to build students' capacity to learn how to learn and be strategic, self-aware participants in an ever-complex and fast-changing society. Embracing what they call our "moral imperative," the authors encourage us to help students "pursue the goals that will make them feel whole as human beings."

Paper Trails Cameron Blevins 2021-03-04 A groundbreaking history of how the US Post made the nineteenth-century American West. There were five times as many post offices in the United States in 1899 than there are McDonald's restaurants today. During an era of supposedly limited federal government, the United States operated the most expansive national postal system in the world. In this cutting-edge interpretation of the late nineteenth-century United States, Cameron Blevins argues that the US Post wove together two of the era's defining projects: western expansion and the growth of state power. Between the 1860s and the early 1900s, the western United States underwent a truly dramatic reorganization of people, land, capital, and resources. It had taken Anglo-Americans the better part of two hundred years to occupy the eastern half of the continent, yet they occupied the West within a single generation. As millions of settlers moved into the region, they relied on letters and newspapers, magazines and pamphlets, petitions and money orders to stay connected to the wider world. Paper Trails maps the spread of the US Post using a dataset of more than 100,000 post offices, revealing a new picture of the federal government in the West. The western postal network bore little resemblance to the civil service bureaucracies typically associated with government institutions. Instead, the US Post grafted public mail service onto private businesses, contracting with stagecoach companies to carry the mail and paying local merchants to distribute letters from their stores. These arrangements allowed the US Post to rapidly spin out a vast and ephemeral web of postal infrastructure to thousands of distant places. The postal network's sprawling geography and localized operations forces a reconsideration of the American state, its history, and the ways in which it exercised power.
