Information Resources in Toxicology P.J. Bert Hakkinen 2009-08-19 This latest version of Information Resources in Toxicology (IRT) continues a tradition established in 1982 with the publication of the first edition in presenting an extensive itemization, review, and commentary on the information infrastructure of the field. This book is a unique wide-ranging, international, annotated bibliography and compendium of major resources in toxicology and allied fields such as environmental and occupational health, chemical safety, and risk assessment. Thoroughly updated, the current edition analyzes technological changes and is rife with online tools and links to Web sites. IRT-IV is highly structured, providing easy access to its information. Among the "hot topics covered are Disaster Preparedness and Management, Nanotechnology, Omics, the Precautionary Principle, Risk Assessment, and Biological, Chemical and Radioactive Terrorism and Warfare are among the designated. • International in scope, with contributions from over 30 countries • Numerous key references and relevant Web links • Concise narratives about toxicologic sub-disciplines • Valuable appendices such as the IUPAC Glossary of Terms in Toxicology • Authored by experts in their respective sub-disciplines within toxicology

Wheater's Functional Histology Barbara Young 2006-03-31 This best-selling atlas contains over 900 images and illustrations to help you learn and review the microstructure of human tissues. The book starts with a section on general cell structure and replication. Basic tissue types are covered in the following section, and the third section presents the microstructures of each of the major body systems. The highest -quality color light micrographs and electron micrograph images are accompanied by concise text and captions which explain the appearance, function, and clinical significance of each image. The accompanying website lets you view all the images from the atlas with a "virtual microscope", allowing you to view the image at a variety of pre-set magnifications. Utilizes "virtual microscope" function on the website, allowing you to see images first in low-powered and then in high powered magnification. Incorporates new information on histology of bone marrow, male reproductive system, respiratory system, pancreas, blood, cartilage, muscle types, staining methods, and more. Uses Color coding at the side of each page to make it easier to access information quickly and efficiently. Includes access to www.studentconsult.com, an interactive community center with a wealth of additional resources!

Wheater's Basic Pathology Barbara Young (Pathologist) 2011 This text offers a comprehensive introduction to pathology first by covering fundamental pathological processes and then addressing the common diseases encountered in systems pathology. Hundreds of high-quality images illustrate the essential features of pathology and make it easy to make definitive comparisons to your own lab sample, while concise captions enable you to quickly and easily understand key points.

Di Fiore's Atlas of Histology with Functional Correlations Victor P. Eroschenko 1993 Since its first appearance in 1957, the Atlas has been regarded as the expert in the field of histology. The 7th edition reflects a new integrated approach to histology, presenting structure and is completely updated, rewritten, revised and expanded by Dr Eroschenko. 17 new colour drawings and clear labels have replaced older figures and functional correlations have been introduced. The book combines morphology with function.

WHO Guidelines for Indoor Air Quality World Health Organization 2009 Microbial pollution is a key element of indoor air pollution. It is caused by hundreds of species of bacteria and fungi, in particular filamentous fungi (mould), growing indoors when sufficient moisture is available. This document provides a comprehensive review of the scientific evidence on health problems associated with building moisture and biological agents. The review concludes that the most important effects are increased prevalences of respiratory symptoms, allergies and asthma as well as perturbation of the immunological system. The document also summarizes the available information on the conditions that determine the presence of mould and measures to control their growth indoors. WHO guidelines for protecting public health are formulated on the basis of the review. The most important means for avoiding adverse health effects is the prevention (or minimization) of persistent dampness and microbial growth on interior surfaces and in building structures. [Ed.]

Updated to reflect the latest research in the field and enhanced with more than 600 full-color illustrations, the thirteenth edition of Junqueira's represents the most comprehensive and modern approach to understanding medical histology available anywhere.

The Most Dangerous Game by Richard Connell or The Hounds of Zaroff | Alltime Bestseller Book From the Author of Books Like: The Sin of Monsieur Pettipon, and Other Humorous Tales / El malvado Zaroff / Delitto in mare / What Ho!

mare 4. What Ho! 5. The Sin of Monsieur Pettipon 6. Apes And Angels 7. From Observables to Unobservables in Science and Philosophy 8. The Mad Lover About the Book: The Most Dangerous Game, also published as The Hounds of Zaroff, is a short story by Richard Connell first published in Collier's magazine on January 19, 1924. It features a big-game hunter from New York who falls off a yacht and swims to an isolated island in the Caribbean where he is hunted by a Cossack aristocrat. The story is an adaptation of the big-game hunting safaris in Africa and South America that were fashionable among wealthy Americans in the 1920s. Big-game hunter Sanger Rainsford and his friend, Whitney, are traveling to the Amazon rainforest for a jaguar hunt. After a discussion about how they are "the hunters" instead of "the hunted," Whitney goes to bed and Rainsford hears gunshots. He climbs onto the yacht's rail and accidentally falls overboard, swimming to Ship-Trap Island, which is notorious for shipwrecks. On the island, he finds a palatial chateau inhabited by two Cossacks: the owner, General Zaroff, and his gigantic deaf-mute servant, Ivan. Zaroff, another big-game hunter, knows of Rainsford from his published account of hunting snow leopards in Tibet. Over dinner, the middle-aged Zaroff explains that although he has been hunting animals since he was a boy, he has decided that killing big-game has become boring for him, so after escaping the Russian Revolution he moved to Ship-Trap Island and set it up to trick ships into wrecking themselves on the jagged rocks that surround it. He takes the survivors captive and hunts them for sport, giving them food, clothing, a knife, and a three-hour head start, and using only a small-caliber pistol for himself. Any captives who can elude Zaroff, Ivan, and a pack of hunting dogs for three days are set free. He reveals that he has won every hunt to date. Captives are offered a choice between being hunted or turned over to Ivan, who once served as official knouter for The Great White Czar. Rainsford denounces the hunt as barbarism, but Zaroff replies by claiming that "life is for the strong." Realizing he has no way out, Rainsford reluctantly agrees to be hunted. During his head start, Rainsford lays an intricate trail in the forest and then climbs a tree. Zaroff finds him easily, but decides to play with him as a cat would with a mouse, standing underneath the tree Rainsford is hiding in, smoking a cigarette, and then abruptly departing. After the failed attempt at eluding Zaroff, Rainsford builds a Malay man-catcher, a weighted log attached to a trigger. This contraption injures Zaroff's shoulder, causing him to return home for the night, but he shouts his respect for the trap before departing. The next day Rainsford creates a Burmese tiger pit, which kills one of Zaroff's hounds. He sacrifices his knife and ties it to a sapling to make another trap, which kills Ivan when he stumbles into it. To escape Zaroff and his approaching hounds, Rainsford dives off a cliff into the sea; Zaroff, disappointed at Rainsford's apparent suicide, returns home. Zaroff smokes a pipe by his fireplace, but two issues keep him from the peace of mind: the difficulty of replacing Ivan and the uncertainty of whether Rainsford perished in his dive. About the Author : Richard Edward Connell, Jr. was an American author and journalist, best known for his short story "The Most Dangerous Game." Connell was one of the best-known American short story writers of his time and his stories appeared in the Saturday Evening Post and Collier's Weekly. Connell had equal success as a journalist and screenwriter. He was nominated for an Academy Award in 1942 for

How Tobacco Smoke Causes Disease 2010 This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

Mental Health and Well-Being in Animals Franklin D. McMillan 2008-06-02 The past few decades have seen a virtual explosion of scientific research in the area of cognition, emotions, suffering, and mental states in animals. Studies in the field, laboratory, and clinical medical practice have amassed an overwhelming body of evidence demonstrating that mental well-being is of paramount importance in all aspects of animal care. There is no longer any reasonable doubt among researchers that mental health is of equal importance as physical health and animal well-being. Recent research convincingly shows that physical health is strongly influenced by mental states, thereby making it clear that effective health care requires attention to the emotional well-being as well as physical. Yet, for its vast importance, mental health in veterinary medicine has to date not been compiled and structured into an organized field or body of knowledge. This information, so critical to the formal establishment of the field of mental health and well-being in animals, remains scattered throughout a wide array of scientific journals. This book represents the first authoritative reference text bringing together the most up-to-date information in the variety of subjects comprising the field of mental health and well-being in animals. Bringing together a host of distinguished experts internationally noted in the fields of animal emotion research, animal behavior, cognitive science, and neuroscience, the book represents the first authoritative reference compiling the diverse information on the animal mind and combining the revolutionary advances in the cognitive sciences with the knowledge in veterinary medicine and clinical animal behavior. This book takes a descriptive and proscriptive approach to mental health, mixing the scientific research with practical information with clinical applications for veterinary health

professionals to use in practice.

DiFiore's Atlas of Histology with Functional Correlations Victor P. Eroschenko 2013 diFiore's Atlas of Histology with Functional Correlations explains basic histology concepts through realistic, full-color composite and idealized illustrations of histologic structures. Added to the illustrations are actual photomicrographs of similar structures, a popular trademark of the atlas. All structures are directly correlated with the most important and essential functional correlations, allowing students to efficiently learn histologic structures and their major functions at the same time. This new edition features: · New chapter on cell biology accompanied by both drawings and representative photomicrographs of the main stages in the cell cycle during mitosis · Contents reorganized into four parts, progressing logically from Methods and Microscopy through Tissues and Systems diFiore's Atlas of Histology is the perfect resource for medical and graduate histology students.

Gray's Anatomy Henry Gray 2005 Not since it first published in 1858 has Gray's Anatomy introduced so much innovation to the world of anatomical references. A team of renowned clinicians, anatomists, and basic scientists have radically transformed this classic resource to incorporate all of the newest anatomical knowledge...reorganized it by body region to parallel clinical practice...and added many new surface anatomy, radiologic anatomy, and microanatomy images to complement the exquisite artwork that the book is known for. In addition, a new, multimedia package enables users to consult the printed book...access a dynamic, continuously updated web site...or explore a CD-ROM containing all of the book's images plus 9 fully rotatable, strippable anatomical models. Although there are now many books called "Gray's Anatomy," only this 39th Edition carries on the true lineage of the original text. And, only this 39th Edition delivers so much pragmatic, clinically indispensable information. The result is, once again, the world's definitive source on human anatomy. A new organization-by body region, rather than by organ system-parallels the way physicians approach patients. A new clinical emphasis ensures relevance to everyday practice. Updates reflect the very latest understanding of the pelvic floor · the inner ear · the peritoneum · preimplantation embryology · assisted fertilization · smooth and cardiac muscle · wrist kinematics and kinetics · the temporomandi-bular joint · blood supply to the muscles and skin · topographical, clinico-pathological, and functional anatomy · cross-sectional and endoscopic imaging · the spread of infection along fascial planes · anatomical landmarks that facilitate differential diagnosis · key anatomical variants throughout the body · and many other crucial areas. Almost 400 new illustrations nearly 2,000 in all, over half of them in full color-depict all structures with optimal clarity, includ-ing surface anatomy, radiologic anatomy, and microanatomy. A new, multimedia package enables users to consult the printed book...access a dynamic, continuously updated web site...or explore a CD-ROM containing all of the book's images plus 9 fully rotatable, strippable anatomical models. Clinical reasoning activities included in the workbook section for each chapter promote problem-based learning. Format combining workbook and textbook features gives you immediate review tools in the form of matching exercises, short answer questions, fill-in-the-blank questions, drawing exercises, and critical thinking questions. Sections on pathologic conditions feature intervention protocols as well as indications and contraindications for therapeutic massage. Expert author Sandy Fritz provides credibility and authority to the information presented. Practical Applications boxes in each chapter enable you to see the way material applies to real practice and supports competency-based learning. Highly illustrated format features over 700 full-color line drawings and photos. Updated chapters and artwork have all been revised to reflect the most current industry information and reviewer feedback. MTBOK mapping for instructors on the Evolve website includes a mapping document that links the student objectives in the book to the components of the MTBOK. New muscle illustrations in Chapter 9 clearly show attachments and actions, as well as the relationships between different muscles in composite drawings. Coverage of nutrition (now in Chapter 12) includes information on the digestive process, basics of solid nutrition, how vitamins and minerals affect the body, and how proper nutrition affects the functions of all systems of the body. Enhanced pathology and indications/contraindications appendix includes more illustrations to increase your understanding of what you may encounter during practice. Improved biomechanics chapter activities that use photos instead of drawings help you better understand and apply gait assessment and muscle testing concepts.

A Practical Guide to Frozen Section Technique Stephen R. Peters 2010-03-20 A Practical Guide to Frozen Section Technique offers an easy to learn approach to frozen section technique in the form of a highly illustrated handbook intended for onsite use in the laboratory. The book begins with a novel, clearly delineated, step by step approach to learning continuous motion brush technique. Emphasis is placed on recognizing and correcting artifacts during the preparation process. The book addresses all of the steps in the preparation of slides from cutting through cover-slipping. The author's unique, original techniques for tissue embedding including face down embedding in steel well bars, frozen block cryoembedding and paper cryoembedding are detailed. Variables key to the quality of the preparation including block temperature, tissue properties and section thickness are detailed. The book also covers understanding the cryostat and basic maintenance and care. Sections covering techniques used in Mohs dermatologic surgery, and techniques used in basic animal and human research are discussed by noted experts in their field. A

Practical Guide to Frozen Section Technique will be of great value to pathologists, pathology residents in training and also experimental pathology researchers that rely upon this methodology to perform tissue analysis in research.

Netter Bases da Histologia William K. Ovalle 2008-01-01 A visual guideline of histologic information essential for prospective physicians and other health care professionals. It aids students and specialists studying slides under a microscope and examining digitized images on a computer screen. It facilitates recognition and interpretation of microscopic sections and provides relevant frames of reference for understanding basic histologic principles. It helps clarify lectures, supplements standard textbooks, and provides a comprehensive review for course examinations. It also assists students in preparing for National Board and Licensing Examinations. Finally, the book is intended to awaken readers to both the intricacies of the human body and the sheer beauty of its cells, tissues and organ systems.

Kenyon 2018-03-14 This book is open access under a CC BY 4.0 license. This textbook, endorsed by the European Society for Blood and Marrow Transplantation (EBMT), provides adult and paediatric nurses with a full and informative guide covering all aspects of transplant nursing, from basic principles to advanced concepts. It takes the reader on a journey through the history of transplant nursing, including essential and progressive elements to help nurses improve their knowledge and benefit the patient experience, as well as a comprehensive introduction to research and auditing methods. This new volume specifically intended for nurses, complements the ESH-EBMT reference title, a popular educational resource originally developed in 2003 for physicians to accompany an annual training course also serving as an educational tool in its own right. This title is designed to develop the knowledge of nurses in transplantation. It is the first book of its kind specifically targeted at nurses in this specialist field and acknowledges the valuable contribution that nursing makes in this area. This volume presents information that is essential for the education of nurses new to transplantation, while also offering a valuable resource for more experienced nurses who wish to update their knowledge.
