Beyond Words Carl Safina 2015-07-14 In a world where we usually measure animals by human standards, prize-winning author and MacArthur Fellow Carl Safina takes us inside their lives and minds, witnessing their profound capacity for perception, thought and emotion, showing why the word "it" is often inappropriate as we discover who they really are. Weaving decades of observations of actual families of free-living creatures with new discoveries about brain functioning, Carl Safina's narrative breaches many commonly held boundaries between humans and other animals. In *Beyond Words*, readers travel the wilds of Africa to visit some of the last great elephant gatherings, then follow wolves of Yellowstone National Park sort out the aftermath of their personal tragedy, then plunge into the astonishingly peaceful society of killer whales living in waters of the Pacific Northwest. We spend quality time, too, with dogs and falcons and ravens; and consider how the human mind originated. In his wise and passionate new book, Safina delivers a graceful examination of how animals truly think and feel, which calls to question what really does—and what should—make us human.

*The Atlas of the World's Most Dangerous Animals* Paula Hammond 2010 Lists the dangerous animals of the world by continent, providing key facts about their lifespan, diet, physical characteristics, habitats, and why each animal is considered dangerous.

A Curious Collection of Dangerous Creatures Sami Bayly 2021-12-14 From the goliath tigerfish to the Asian hornet to the wolverine—here's a visual treasure trove of the scariest and most dangerous animals on the planet
