Aquatic Biodiversity II H. Segers 2006-01-20 Freshwater Biodiversity is a much underestimated component of global biodiversity, both in its diversity and in its potential to act as models for fundamental research in evolutionary biology and ecosystem studies. Freshwater organisms also reflect quality of water bodies and can thus be used to monitor changes in ecosystem health. The present book comprises a unique collection of primary research papers spanning a wide range of topics in aquatic biodiversity studies, and including a first global assessment of specific diversity of freshwater animals. The book also presents a section on the interaction between scientists and science policy managers. A target opinion paper lists priorities in aquatic biodiversity research for the next decade and several reactions from distinguished scientists discuss the relevance of these items from different points of view: fundamental ecology, taxonomy and systematics, needs of developing countries, present-day biodiversity policy at European and at global scales. It is believed that such a platform for the interaction between science and science policy is an absolute necessity for the efficient use of research budgets in the future.

Karst Management Philip E. van Beynen 2011-06-21 Focusing specifically on the management of karst environments, this volume draws together the world's leading karst experts to provide a vital source for the study and management of this unique physical setting. Although karst landscapes cover 12% of the Earth's terrain and provide 25% of the world's drinking water, the resource management of karst environments has only previously received indirect attention. Through a comprehensive approach, *Karst Management* focuses on engineering issues associated with surface karst such as quarries, dams, and agriculture, subsurface topics such as the management of groundwater, show caves, cave biota, and geo-archaeology projects. Chapters that focus on karst as an integrated system look at IUCN World Heritage sites, national parks, policy and regulation, measuring systematic disturbance, information management, and public environmental education. The text incorporates the most up-to-date research from leading karst scientists. This volume provides important perspectives for university students, educators, geoengineers, resource managers, and planners who are interested in or work with this unique physical landscape.

6th International Conference on the Conservation of Earthen Architecture The Getty Conservation Institute 1991-02-28 On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATERre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

The William Parker Sessionography Rick Lopez 2014 This is a fully annotated (and generously illustrated) record of practically every time that elemental jazz double bassist-composer William Parker has ever played a gig or recording session, as a band member or leader, from 1972 clear through to June 2014. A vast microcosm of one profoundly engaged jazz musician which reveals an illuminated macrocosm of jazz itself.

Post Memes: Seizing the Memes of Production Alfie Bown 2019-11-05 Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trolololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticals alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. POST MEMES: SEIZING THE MEMES OF PRODUCTION takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. ABOUT THE EDITORS ALFIE BOWN is the author of several books including "The Playstation Dreamworld" (Polity, 2017) and "In the Event of Laughter: Psychoanalysis, Literature and Comedy" (Bloomsbury, 2018). He is also a journalist for the Guardian, the Paris Review, and other outlets. DAN BRISTOW is a recovering academic, a bookseller, and author of "Joyce and Lacan: Reading, Writing, and Psychoanalysis" (Routledge, 2016) and "2001: A Space Odyssey and Lacanian Psychoanalytic Theory" (Palgrave, 2017). He is also the co-creator with Alfie Bown of Everyday Analysis, now based at New Socialist magazine.

Globalization and Environmental Challenges Hans Günter Brauch 2008-01-23 Put quite simply, the twin impacts of globalization and environmental degradation pose new security dangers and concerns. In this new work on global security thinking, 91 authors from five continents and many disciplines, from science and practice, assess the worldwide reassessment of the meaning of security triggered by the end of the Cold War and globalization, as well as the multifarious impacts of global environmental change in the early 21st century.

The Architecture of the French Enlightenment Allan Braham 1989-01-01 Allan Braham's comprehensive treatment of this brilliant and complex period introduces the reader to the major buildings, architects, and architectural patrons of the day. At the same time, it explores the broader determinants of architectural production: the rapid economic expansion of Paris and the main provincial centers and the increasing demand for improved public amenities--theaters, schools, markets, and hospitals. This generously illustrated book provides a vivid commentary on society and manners in pre-Revolutionary France.

The Qur'an Seminar Commentary / Le Qur'an Seminar Mehdi Azaiez 2016-11-07 The present volume is the work of 25 scholars who represent various specializations important to the study of the Qur'an, including Arabic language, comparative Semitic linguistics, paleography, epigraphy, history, rhetorical theory, hermeneutics, and Biblical studies. The starting point of this work was a series of five international conferences on the Qur'an at the University of Notre Dame over the academic year 2012-13, although the commentaries contributed during those conferences have been carefully edited to avoid repetition. Readers of The Qur'an Seminar Commentary will find that the 50 passages selected for inclusion in this work include many of the most important and influential elements of the Qur'an, including: - Q 1, al-Fatiha - Q 2:30-39, the angelic prostration before Adam - Q 2:255, the "Throne Verse" - Q 3:7, the mukhamat and mutashabihat - Q 4:3, polygamy and monogamy - Q 5:112-15, the table (al-ma'ida) from heaven - Q 9:29, fighting the People of the Book and the jizya - Q 12, the story of Joseph - Q 24:45, the "Light Verse" - Q 33:40, the "seal of the prophets" - Q 53, the "satanic verses" - Q 96, including the passage often described as the "first revelation" - Q 97, the "night of qadr" - Q 105, the "Companions of the Elephant" - Q 112, on God and the denial of a divine son The collaborative nature of this work, which involves a wide range of scholars discussing the same passages from different perspectives, offers readers with an unprecedented diversity of insights on the Qur'anic text.

Galighani's Messenger 1822

Code Director Edmond J Safra Center for Ethics and Roy L Furman Professorship of Law Lawrence Lessig 2016-08-31 There's a common belief that cyberspace cannot be regulated-that it is, in its very essence, immune from the government's (or anyone else's) control.Code argues that this belief is wrong. It is not in the nature of cyberspace to be unregulable; cyberspace has no "nature." It only has code-the software and hardware that make cyberspace what it is. That code can create a place of freedom-as the original architecture of the Net did-or a place of exquisitely oppressive control.If we miss this point, then we will miss how cyberspace is changing. Under the influence of commerce, cyberspace is becoming a highly regulable space, where our behavior is much more tightly controlled than in real space.But that's not inevitable either. We can-we must-choose what kind of cyberspace we want and what freedoms we will guarantee. These choices are all about architecture: about what kind of code will govern cyberspace, and who will control it. In this realm, code is the most significant form of law, and it is up to lawyers, policymakers, and especially citizens to decide what values that code embodies.

The lexeme in descriptive and theoretical morphology Olivier Bonami After being dominant during about a century since its invention by Baudouin de Courtenay at the end of the nineteenth century, morpheme is more and more replaced by lexeme in contemporary descriptive and theoretical morphology. The notion of a lexeme is usually associated with the work of P. H. Matthews (1972, 1974), who characterizes it as a lexical entity abstracting over individual inflected words. Over the last three decades, the lexeme has become a cornerstone of much work in both inflectional morphology and word formation (or, as it is increasingly been called, lexeme formation). The papers in the present volume take stock of the descriptive and theoretical usefulness of the lexeme, but also adress many of the challenges met by classical lexeme-based theories of morphology.

Fair Shares for All Jean-Pierre Gross 2003-11-13 This study explores the egalitarian policies pursued in the provinces during the radical phase of the French Revolution, but moves away from the habit of looking at such issues in terms of the Terror alone. It challenges revisionist readings of Jacobinism that dwell on its totalitarian potential or portray it as dangerously utopian. The mainstream Jacobin agenda emphasised 'fair shares' and equal opportunities for all in a private ownership market economy. It sought to achieve social justice without jeopardising human rights and tended thus to complement, rather than undermine, the liberal, individualist programme of the Revolution. The book stresses the relevance of the 'Enlightenment legacy', the close affinity between Girondins and Montagnards, the key role played by many lesser-known figures and the moral ascendancy of Robespierre. It reassesses the basic social and economic issues at stake in the Revolution, which cannot be understood solely in terms of political discourse.

Peter Read Miller on Sports Photography Peter Read Miller 2013-08-31 In *Peter Read Miller on Sports Photography*, the 30-year Sports Illustrated veteran photographer takes you into the action of many of his most iconic shots, relating the stories behind the photos of some of the world's greatest athletic events, including the Olympics and the Super Bowl. Discussing the circumstances surrounding particular shots, Peter shares observations of the athletes themselves, and provides tips and techniques for sports photographers of all levels looking to capture great photos of football, track and field, gymnastics, and swimming, as well as dynamic portraits of athletes. Unlike photo collections by other greats of sports photography, this book seamlessly interweaves the images and the fascinating stories behind them with photographic instruction, while giving you an inside look at what it's like to work at the nation's leading sports publication. Beautifully illustrated with images from the Olympics, football, and portrait sessions with professional athletes, this book offers a rich and inspiring experience for sports photographers, sports fans, and Sports Illustrated readers.

Monstrous Imagination Marie H el ene Huet 1993 What woeful maternal fancy produced such a monster? This was once the question asked when a deformed infant was born. From classical antiquity through to the Enlightenment, the monstrous child bore witness to the fearsome power of the mother's imagination. What such a notion meant and how it reappeared, transformed, in the Romantic period are the questions explored in this book, a study of theories linking imagination, art and monstrous progeny.
