The Behavioral and Cognitive Neurology of Stroke Olivier Godefroy 2007-01-18

This book is about the care of stroke patients, focusing on behavioural and cognitive problems. It provides a comprehensive review of the field covering the diagnostic value of these conditions, in the acute and later phases, their requirements in terms of treatment and management and the likelihood and significance of long-term disability. This book will appeal to all clinicians involved in the care of stroke patients, as well as to neuropsychologists, other rehabilitation therapists and research scientists investigating the underlying neuroscience.

The CrazyLadies of Pearl Street Trevanian 2006-06-06
Legendary writer Trevanian brings readers his most personal novel yet: a funny, deeply felt, often touching coming-of-age novel set in 1930s America. Six-year-old Jean-Luc LaPointe, his little sister, and his spirited but vulnerable young mother have been abandoned—again—by his father, a charming con artist. With no money and nowhere else to go, the LaPointes create a fragile nest in a tenement building at 238 North Pearl Street in Albany, New York. For the next eight years, through the Great Depression and Second World War, they live in the heart of the Irish slum, surrounded by ward heelers, unemployment, and grinding poverty. Pearl Street is also home to a variety of “crazyLadies”: Miss Cox, the feared and ridiculed teacher who ignites Jean-Luc’s imagination; Mrs. Kane, who runs a beauty parlor/fortune-telling salon in the back of her husband’s grocery store; Mrs. Meehan, the desperate, harried matriarch of a thuggish family across the street; lonely Mrs. McGivney, who spends every day tending to her catatonic husband, a veteran of the Great War; and Jean-Luc’s own unconventional, vivacious mother. Colorful though it is, Jean-Luc never stops dreaming of a way out of the slum, and his mother’s impossible expectations are both his driving force and his burden. As legendary writer Trevanian lovingly re-creates the neighborhood of his youth in this funny, deeply moving coming-of-age novel, he also paints a vivid portrait of a neighborhood, a city, a nation in turmoil,

and the people waiting for a better life to begin. It's a heartfelt and unforgettable look back at one child's life in the 1930s and '40s, a story that will be remembered long after the last page is turned.

The Educated Mind Kieran Egan 2007-12-01 The Educated Mind offers a bold and revitalizing new vision for today's uncertain educational system. Kieran Egan reconceives education, taking into account how we learn. He proposes the use of particular "intellectual tools"—such as language or literacy—that shape how we make sense of the world. These mediating tools generate successive kinds of understanding: somatic, mythic, romantic, philosophical, and ironic. Egan's account concludes with practical proposals for how teaching and curriculum can be changed to reflect the way children learn. "A carefully argued and readable book. . . . Egan proposes a radical change of approach for the whole process of education. . . . There is much in this book to interest and excite those who discuss, research or deliver education."—Ann Fullick, *New Scientist* "A compelling vision for today's uncertain educational system."—*Library Journal* "Almost anyone involved at any level or in any part of the education system will find this a fascinating book to read."—Dr. Richard Fox, *British Journal of Educational Psychology* "A fascinating and provocative study of cultural and linguistic history, and of how various kinds of understanding that can be distinguished in that history are recapitulated in the developing minds of children."—Jonty Driver, *New York Times Book Review*

The Uninhabitable Earth David Wallace-Wells 2020-03-17 #1 NEW YORK TIMES BESTSELLER • "The Uninhabitable Earth hits you like a comet, with an overflow of insanely lyrical prose about our pending Armageddon."—Andrew Solomon, author of *The Noonday Demon* With a new afterword It is worse, much worse, than you think. If your anxiety about global warming is dominated by fears of sea-level rise, you are barely scratching the surface of what terrors are possible—food shortages, refugee emergencies, climate wars and economic devastation. An "epoch-defining book" (*The Guardian*) and "this generation's *Silent Spring*" (*The Washington Post*), *The Uninhabitable Earth* is both a travelogue of the near future and a meditation on how that future will look to those living through it—the ways that warming promises to transform global politics, the meaning of technology and nature in the modern world, the sustainability of capitalism and the trajectory of human progress. *The Uninhabitable Earth* is also an impassioned call to action. For just as the world was brought to the brink of catastrophe within the span of a lifetime, the responsibility to avoid it now belongs to a single generation—today's. Praise for *The Uninhabitable Earth* "The Uninhabitable Earth is the most terrifying book I have ever read. Its subject is climate change, and its method is scientific, but its mode is Old Testament. The book is a meticulously documented, white-knuckled tour through the

cascading catastrophes that will soon engulf our warming planet.”—Farhad Manjoo, *The New York Times* “Riveting. . . . Some readers will find Mr. Wallace-Wells’s outline of possible futures alarmist. He is indeed alarmed. You should be, too.”—*The Economist* “Potent and evocative. . . . Wallace-Wells has resolved to offer something other than the standard narrative of climate change. . . . He avoids the ‘eerily banal language of climatology’ in favor of lush, rolling prose.”—Jennifer Szalai, *The New York Times* “The book has potential to be this generation’s *Silent Spring*.”—*The Washington Post* “*The Uninhabitable Earth*, which has become a best seller, taps into the underlying emotion of the day: fear. . . . I encourage people to read this book.”—Alan Weisman, *The New York Review of Books*

My Stroke of Insight Jill Bolte Taylor 2008-05-12 "Transformative...[Taylor's] experience...will shatter [your] own perception of the world."—ABC News The astonishing *New York Times* bestseller that chronicles how a brain scientist's own stroke led to enlightenment On December 10, 1996, Jill Bolte Taylor, a thirty-seven-year-old Harvard-trained brain scientist experienced a massive stroke in the left hemisphere of her brain. As she observed her mind deteriorate to the point that she could not walk, talk, read, write, or recall any of her life—all within four hours—Taylor alternated between the euphoria of the intuitive and kinesthetic right brain, in which she felt a sense of complete well-being and peace, and the logical, sequential left brain, which recognized she was having a stroke and enabled her to seek help before she was completely lost. It would take her eight years to fully recover. For Taylor, her stroke was a blessing and a revelation. It taught her that by "stepping to the right" of our left brains, we can uncover feelings of well-being that are often sidelined by "brain chatter." Reaching wide audiences through her talk at the Technology, Entertainment, Design (TED) conference and her appearance on Oprah's online Soul Series, Taylor provides a valuable recovery guide for those touched by brain injury and an inspiring testimony that inner peace is accessible to anyone.

Mental Maths Strategies Alan Parker 2004 More than just Mental Maths books - this series will equip students with all the mental maths strategies they need to excel in Maths through out their lives. Neighbourhood Effects Research: New Perspectives Maarten van Ham 2011-11-22

Over the last 25 years a vast body of literature has been published on neighbourhood effects: the idea that living in more deprived neighbourhoods has a negative effect on residents' life chances over and above the effect of their individual characteristics. The volume of work not only reflects academic and policy interest in this topic, but also the fact that we are still no closer to answering the question of how important neighbourhood effects actually are. There is little doubt that these effects exist, but we do not know enough about the causal mechanisms which produce them, their relative importance in shaping individual's life chances, the circumstances or conditions under which they are most important, or the most effective policy responses. Collectively, the chapters in this book offer new perspectives on these questions, and refocus the academic debate on neighbourhood effects. The book enriches the neighbourhood effects literature with insights from a wide range of disciplines and countries.

Chronicles of Wasted Time Malcolm Muggeridge 2006 Back in print for the first time since Muggeridge's death in 1990, both published volumes of his acclaimed biography-The Green Stick and The Infernal Grove, plus the previously unpublished start to an unfinished third volume entitled The Right Eye-all brought together in one unabridged volume. "There is not a flat page in this mingling of anecdote, comment and self-criticism. . . . An international throng of writers, politicians, soldiers, spies, traitors and eccentrics jostles in these page from Attlee to Wodehouse via Burgess and Philby, Churchill, de Gaulle, Gide, Chanel, Montgomery, Evelyn Waugh." -The Daily Telegraph "Much of it . . . is very funny indeed; his description of being inducted into the mysteries of invisible writing when he joined the M16, for instance, is one of the great comic set-pieces that are artfully placed throughout the book. . . . Apart from these, the wit sparkles on almost every page." -The Observer ". . . this is one of the most delightful and entertaining memoirs of our age." -The Washington Post "A sure hand pushes the pen; a splendid mind guides the hand. There are paragraphs in this book that . . . are models of the best of clarity, grace and beauty in the English language." -The Dallas Morning News Born in 1903, Malcolm Muggeridge started his career as a university lecturer in Cairo before taking up journalism. As a journalist he worked around the world on the Guardian, Calcutta Statesman, the Evening Standard and the Daily Telegraph. In

1953 became editor of Punch, where he remained for four years. In later years he became best known as a broadcaster both on television and radio for the BBC. His other books include Jesus Rediscovered, Christ and the Media, and A Third Testament.

By putting into practice the ninety-three wise instructions that make up The Art of Living, readers learn to successfully meet the challenges of everyday life.

No Local Greg Sharzer 2012-04-27 Can making things smaller make the world a better place? No Local takes a critical look at localism, an ideology that says small businesses, ethical shopping and community initiatives like gardens and farmers' markets can stop corporate globalization. These small acts might make life better for some, but they don't challenge the drive for profit that's damaging our communities and the earth. No Local shows how localism's fixation on small comes from an outdated economic model. Growth is built into capitalism. Small firms must play by the same rules as large ones, cutting costs, exploiting workers and damaging the environment. Localism doesn't ask who controls production, allowing it to be co-opted by governments offloading social services onto the poor. At worst, localism becomes a strategy for neoliberal politics, not an alternative to it. No Local draws on political theory, history, philosophy and empirical evidence to argue that small isn't always beautiful. Building a better world means creating local social movements that grow to challenge, not avoid, market priorities.

Kaczynski saw violent collapse as the only way to bring down the techno-industrial system, and in more than a decade of mail bomb terror he killed three people and injured 23 others. One does not need to support the actions that landed Kaczynski in supermax prison to see the value of his essays disabusing the notion of heroic technology while revealing the manner in which it is destroying the planet. For the first time, readers will have an uncensored personal account of his anti-technology philosophy, including a corrected version of the notorious 'Unabomber Manifesto,' Kaczynski's critique of anarcho-primitivism, and essays regarding 'the Coming Revolution.'

The Licit Life of Capitalism Hannah Appel 2019-12-13 The Licit Life of Capitalism is both an account of a specific capitalist project—U.S. oil companies working off the shores of Equatorial Guinea—and a sweeping theorization of more general forms and processes that facilitate diverse capitalist projects around the world. Hannah Appel draws on extensive fieldwork with managers and rig workers, lawyers and bureaucrats, the expat wives of American oil executives and the Equatoguinean women who work in their homes, to turn conventional critiques of capitalism on their head, arguing that market practices do not merely exacerbate inequality; they are made by it. People and places differentially valued by gender, race, and colonial histories are the terrain on which the rules of capitalist economy are built. Appel shows how the corporate form and the contract, offshore rigs and economic theory are the assemblages of liberalism and race, expertise and gender, technology and domesticity that enable the licit life of capitalism—practices that are legally sanctioned, widely replicated, and ordinary, at the same time as they are messy, contested, and, arguably, indefensible.
