Consilience E. O. Wilson 2014-11-26 "A dazzling journey across the sciences and humanities in search of deep laws to unite them." --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

The Devil In The White City Erik Larson 2010-09-30 'An irresistible page-turner that reads like the most compelling, sleep defying fiction' TIME OUT One was an architect. The other a serial killer. This is the incredible story of these two men and their realization of the Chicago World's Fair of 1893, and its amazing 'White City'; one of the wonders of the world. The architect was Daniel H. Burnham, the driving force behind the White City, the massive, visionary landscape of white buildings set in a wonderland of canals and gardens. The killer was H. H. Holmes, a handsome doctor with striking blue eyes. He used the attraction of the great fair - and his own devilish charms - to lure scores of young women to their deaths. While Burnham overcame politics, infighting, personality clashes and Chicago's infamous weather to transform the swamps of Jackson Park into the greatest show on Earth, Holmes built his own edifice just west of the fairground. He called it the World's Fair Hotel. In reality it was a torture palace, a gas chamber, a crematorium. These two disparate but driven men are brought to life in this mesmerizing, murderous tale of the legendary Fair that transformed America and set it on course for the twentieth century . . .

Ritual Masks Henry Pernet 2006-03-01 Ritual masking is an important institution in many traditional societies and has attracted much attention from Western scholars. In 'Ritual Masks', Pernet provides a thorough survey of masks and masking traditions in Africa, Oceania, and the Americas, based on a close analysis of the literature in several languages. Pernet's approach provides him with an opportunity to examine issues of importance to the history of religion and anthropology. These include the influence of theory on the interpretation of prehistoric documents; androcentrism in anthropology and the history of religions; and Western scholarship's recurrent problems in interpreting preliterate or traditional societies.

Wilder Mann Charles Fréger 2012 Each year, throughout Europe, from Scotland to Bulgaria, from Finland to Italy, from Portugal to Greece via France, Switzerland and Germany, people literally put themselves into the skin of the "savage," in masquerades that stretch back centuries. The rituals are centuries old and celebrate the seasonal cycle, fertility, life, and death. By becoming a bear, a goat, a stag, a wild boar, a man of straw, a devil, or a monster with jaws of steel, these people celebrate the cycle of life and seasons. The costumes amaze with their extraordinary diversity and prodigious beauty. Work on this project took leading French photographer Charles Fréger to eighteen European countries in search of the mythological figure of the Wild Man.

Culture and Imperialism Edward W. Said 2012-10-24 A landmark work from the author of *Orientalism* that explores the long-overlooked connections between the Western imperial endeavor and the culture that both reflected and reinforced it. In the nineteenth and early twentieth centuries, as the Western powers built empires that stretched from Australia to the West Indies, Western artists created masterpieces ranging from *Mansfield Park* to *Heart of Darkness* and *Aida*. Yet most cultural critics continue to see these phenomena as separate. Edward Said looks at these works alongside those of such writers as W. B. Yeats, Chinua Achebe, and Salman Rushdie to show how subject peoples produced their own vigorous cultures of opposition and resistance. Vast in scope and stunning in its erudition, *Culture and Imperialism* reopens the dialogue between literature and the life of its time.

Savage Mind to Savage Machine Ginger Nolan 2021-06-29 An examination of how concepts of “the savage” facilitated technological approaches to modernist design. Attempting to derive aesthetic systems from natural structures of human cognition, designers looked toward the “savage mind”—a way of thinking they associated with a racialized subaltern. In *Savage Mind to Savage Machine*, Ginger Nolan uncovers an enduring relationship between “the savage” and the development of technology and its wide-ranging impact on society, including in the fields of architecture and urbanism, the industrial arts, and digital design. Nolan focuses on the relationship between the applied arts and the structuralist social sciences, proposing that the late-nineteenth-century rise of Freudian psychology, ethnology, and structuralist linguistics offered innovations and new opportunities in studying human cognition. She looks at institutions ranging from the Public Industrial Arts School of Philadelphia and the Weimar Bauhaus to the MIT Media Lab and the Centre Mondial Informatique, revealing a persistent theme of twentieth-century design: to supplant language with more subliminal, aesthetic modes of communication, thereby inculcating a deep intimacy between human habit and new technologies of production, communication, and consumption. This book’s ultimate critique is of the development of the ergonomics of the spirit—the design of the human cognitive apparatus in relation to new aesthetic technologies. Nolan sees these ergonomics as a means of depoliticizing societies through aesthetic technologies intended to seamlessly integrate humans into the programs of capitalist modernity. Revising key modernist design narratives, *Savage Mind to Savage Machine* provides a deep historical foundation for understanding our contemporary world.

Savage Grace Jay Griffiths 2015-01-01 Jay Griffiths is a tour guide for anyone who has ever wished to commune with the side of our human psyche that remains in touch with the wild. Equally at home among the “sea gypsy” Bajo people who live off the coast of Thailand and forage their food from the ocean floor, drinking the psychedelic ayahuasca plant with Amazonian shamans, or joining an Inuit whale hunt at the northern tip of Canada, Griffiths takes readers on an adventure both charted and un-chartable. She divides her meditations on these travels into sections named after the ancient elemental properties of the universe—Earth, Air, Fire, Ice, and Water—because her subject matter is not merely the

places traveled to but the depths of mind and the cultural narratives revealed by place. It is a universal story told of far-flung groups of humans, with vastly different ways of life, connected through the varied wilderness that sustains them. By describing the ways in which human societies and the human mind have developed in response to the wilder elements of our homelands, *Savage Grace* reveals itself as a benediction for the emotional, intellectual, and physical nourishment that people continue to draw from the natural world. Under the sway of Griffiths' charisma, her poetic prose, and her deeply learned and persuasive case for the wild roots of our shared human being, we learn that we are all, each and every one of us, a force of nature.

The Lost Continent Edgar Rice Burroughs 1916 The year is 2137, over 160 years ago the "Great War" was fought in Europe. The Western Hemisphere stayed out of the conflict, as much as possible, using the slogan: "The East for the East ... The West for the West." For all this time the USA did not go past 30 degrees or 175 degrees latitude. Until the aero-submarine, "Coldwater" in command of Lieutenant Jefferson Turck is blown past the 30 in a raging storm. Damaged, the ship landed in Europe only to find that it was not the enemy that was expected but something entirely different. Originally published in 1915 as "Beyond 30."

Arcadia Britannica Henry Bourne 2015-05-01 Folklore is a living cultural heritage. Folk beliefs, customs and expressions link the past to the present and help us understand our specific cultures, as well as a shared humanity. Founded on pagan Celtic, Germanic and early Christian roots, British folklore, far from being a quaint anachronism, remains vibrant and relevant by adapting to new circumstances, with the folk (people), and the lore (stories) continually informing and influencing each other. There are many recorded folk events, rites and customs practised in the UK each year, with some events drawing crowds of thousands. Most involve dance, theatre, music and a fair amount of good-natured revelry. Henry Bourne's folklore portraits, shot in the wild at key events and festivals, take an affectionate look at the people from Morris dancers to practising witches and warlocks who shy away from a world increasingly disconnected from nature and those who actively celebrate a rich tradition that honours our connection with the seasons, the land and community.

The White Man's Indian Robert F. Berkhofer 2011-08-03 Columbus called them "Indians" because his geography was faulty. But that name and, more importantly, the images it has come to suggest have endured for five centuries, not only obscuring the true identity of the original Americans but serving as an ideological weapon in their subjugation. Now, in this brilliant and deeply disturbing reinterpretation of the American past, Robert Berkhofer has written an impressively documented account of the self-serving stereotypes Europeans and white Americans have concocted about the "Indian": Noble Savage or bloodthirsty redskin, he was deemed inferior in the light of western, Christian civilization and manipulated to its benefit. A thought-provoking and revelatory study of the absolute, seemingly ineradicable pervasiveness of white racism, *The White Man's Indian* is a truly important book which penetrates to the very heart of our understanding of ourselves.
