Inherent Vice Thomas Pynchon 2012-06-13 Part noir, part psychedelic romp, all Thomas Pynchon—Private eye Doc Sportello surfaces, occasionally, out of a marijuana haze to watch the end of an era In this lively yarn, Thomas Pynchon, working in an unaccustomed genre that is at once exciting and accessible, provides a classic illustration of the principle that if you can remember the sixties, you weren't there. It's been a while since Doc Sportello has seen his ex-girlfriend. Suddenly she shows up with a story about a plot to kidnap a billionaire land developer whom she just happens to be in love with. It's the tail end of the psychedelic sixties in L.A., and Doc knows that "love" is another of those words going around at the moment, like "trip" or "groovy," except that this one usually leads to trouble. Undeniably one of the most influential writers at work today, Pynchon has penned another unforgettable book.

Public Health Ethics: Cases Spanning the Globe Drue H. Barrett 2018-04-22 This Open Access book highlights the ethical issues and dilemmas that arise in the practice of public

health. It is also a tool to support instruction, debate, and dialogue regarding public health ethics. Although the practice of public health has always included consideration of ethical issues, the field of public health ethics as a discipline is a relatively new and emerging area. There are few practical training resources for public health practitioners, especially resources which include discussion of realistic cases which are likely to arise in the practice of public health. This work discusses these issues on a case to case basis and helps create awareness and understanding of the ethics of public health care. The main audience for the casebook is public health practitioners, including front-line workers, field epidemiology trainers and trainees, managers, planners, and decision makers who have an interest in learning about how to integrate ethical analysis into their day to day public health practice. The casebook is also useful to schools of public health and public health students as well as to academic ethicists who can use the book to teach public health ethics and distinguish it from clinical and research ethics.

Heart of Darkness Joseph Conrad 2012-08-28 In a novella which remains highly controversial to this day, Conrad explores the relations between Africa and Europe. On the surface, this is a horrifying tale of colonial exploitation. The narrator, Marlowe journeys on business deep into the heart of Africa. But there he encounters Kurtz, an idealist apparently crazed and depraved by his power over the natives, and the meeting prompts Marlowe to reflect on the darkness at the heart of all men. This short but complex and often ambiguous story, which has been the basis of several films and plays, continues to provoke interpretation and discussion. *Heart of Darkness* grew out of a journey Joseph Conrad took up the Congo River; the verisimilitude that the great novelist thereby brought to his most famous tale everywhere enhances its dense and shattering power. Apparently a sailor's yarn, it is in fact a grim parody of the adventure story, in which the narrator, Marlow, travels deep into the heart of the Congo where he encounters the crazed idealist Kurtz and discovers that the relative values of the civilized and the primitive are not what they seem. *Heart of Darkness* is a model of economic storytelling, an indictment of the inner and outer turmoil caused by the European imperial misadventure, and a piercing account of the fragility of the human soul.

The car and the man in it retrieve Denizen with the promise of introducing him to a long-lost aunt. But on the ride into the city, they are attacked. Biochar for Environmental Management Johannes Lehmann 2012-05-16 Biochar is the carbon-rich product when biomass (such as wood, manure or crop residues) is heated in a closed container with little or no available air. It can be used to improve agriculture and the

environment in several ways, and its stability in soil and superior nutrient-retention properties make it an ideal soil amendment to increase crop yields. In addition to this, biochar sequestration, in combination with sustainable biomass production, can be carbon-negative and therefore used to actively remove carbon dioxide from the atmosphere, with major implications for mitigation of climate change. Biochar production can also be combined with bioenergy production through the use of the gases that are given off in the pyrolysis process. This book is the first to synthesize the expanding research literature on this topic. The book's interdisciplinary approach, which covers engineering, environmental sciences, agricultural sciences, economics and policy, is a vital tool at this stage of biochar technology development. This comprehensive overview of current knowledge will be of interest to advanced students, researchers and professionals in a wide range of disciplines.

Clinical Pathways in Stroke Rehabilitation Thomas Platz 2021-01-14 This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.

murder, *Death and the Harlot* is a wild ride through the seedy side of 1750s London, while its heroine, Lizzie Hardwicke, is razor sharp and brilliantly original. I couldn't put it down' Joe Heap 'Atmospheric and full of authentic details about (the oft-neglected but wonderfully complex) eighteenth-century London, Clarke's debut is told from the perspective of a young woman who looks unflinchingly at her world – with all its depravity and discord – in order to carve out a situation that allows her to retain her humanity, her humour, and her own particular brand of honour. Brava to this new, engaging voice and her strong woman protagonist!' Karen Odden, author of *A Lady in the Smoke*

Giovanni Boccaccio, *Theseid of the Nuptials of Emilia* Giovanni Boccaccio 2002 The first epic poem written in Italian is the *Teseida delle nozze di Emilia* (*Theseid of the Nuptials of Emilia*) by Giovanni Boccaccio, the well-known author of the *Decameron*. Conceived and composed during the Florentine author's stay in Naples, it combines masterfully both epic and lyric themes in a genre that may be defined as an epic of love. Besides its intrinsic literary value, the poem reflects the author's youthful emotions and nostalgia for the happiest times of his life.

Born Trump Emily Jane Fox 2018-06-19 Who is Donald J. Trump? To truly understand America's forty-fifth president, argues *Vanity Fair* journalist Emily Jane Fox, you must know his children, whose own stories provide the key to unlocking what makes him tick. *Born Trump* is Fox's dishy, deeply reported, and richly detailed look at Trump's five children (and equally powerful son-in-law, Jared Kushner), exploring their lives, their roles in the campaign and administration, and their dramatic and often fraught relationships with their father and

with one another. Reexamining the tabloid-soaked events that shaped their lives in startling new detail, *Born Trump* is full of surprising insights, previously untold stories, and delicious tidbits about their childhoods (ridiculously privileged and painful, in equal measure) and the extraordinary power they now wield. As a version of this new kind of American royalty they wish to be, they are ensconced not in palaces but in Trump Tower and the White House. Even before Trump's oldest child, Don Jr., was born, Donald told friends that he wanted at least five kids—to make sure there was a greater probability one would turn out just like him. His vision didn't pan out exactly as he'd imagined, but Trump's children each inherited some of his essential traits—as one source says, “collectively, they make the whole.” Ivanka is a media-savvy, hyperskilled messenger with her father's self-promotional ease but without the brash. Don Jr. has the most contentious relationship with his father yet seems prone to endlessly repeat his mistakes. Eric embraced the family's real estate business but has, in surprising ways, charted a more independent course than his siblings. While Tiffany grew up mostly separate from her father, she inherited Trump's perspective as an outsider—his unique combination of assurance and insecurity. And there is Ivanka's husband, Jared Kushner, whose own family drama and personal ambition is a crucial thread in this saga. Come for the vision of Trump as a father—a portrait of the president at his kindest and cruelest. Stay for the revelatory gossip, including the truth about the firings of Christie and Manafort, the inside scoop on Donald's three marriages, why Ivanka and Jared are “bashert,” and how this family of real estate tycoons have become the most powerful people in the world.
