The Leader in Me Stephen R. Covey 2012-12-11 Children in today's world are inundated with information about who to be, what to do and how to live. But what if there was a way to teach children how to manage priorities, focus on goals and be a positive influence on the world around them? The Leader in Me is that programme. It's based on a hugely successful initiative carried out at the A.B. Combs Elementary School in North Carolina. To hear the parents of A. B. Combs talk about the school is to be amazed. In 1999, the school debuted a programme that taught The 7 Habits of Highly Effective People to a pilot group of students. The parents reported an incredible change in their children, who blossomed under the programme. By the end of the following year the average end-of-grade scores had leapt from 84 to 94. This book will launch the message onto a much larger platform. Stephen R. Covey takes the 7 Habits, that have already changed the lives of millions of people, and shows how children can use

them as they develop. Those habits -- be proactive, begin with the end in mind, put first things first, think win-win, seek to understand and then to be understood, synergize, and sharpen the saw -- are critical skills to learn at a young age and bring incredible results, proving that it's never too early to teach someone how to live well.

Congress, the Press, and Political Accountability R. Douglas Arnold 2013-10-31 Congress, the Press, and Political Accountability is the first large-scale examination of how local media outlets cover members of the United States Congress. Douglas Arnold asks: do local newspapers provide the information citizens need in order to hold representatives accountable for their actions in office? In contrast with previous studies, which largely focused on the campaign period, he tests various hypotheses about the causes and consequences of media coverage by exploring coverage during an entire congressional session. Using three samples of local newspapers from across the country, Arnold analyzes all coverage over a two-year period--every news story, editorial, opinion column, letter, and list. First he investigates how twenty-five newspapers covered twenty-five local representatives; and next, how competing newspapers in six cities covered their corresponding legislators. Examination of an even larger sample, sixty-seven newspapers and 187 representatives, shows why some newspapers cover legislators more thoroughly than do other papers. Arnold then links the coverage data with a large public opinion survey to show that the volume of coverage affects citizens' awareness of representatives and challengers. The results show enormous variation in coverage. Some newspapers cover legislators frequently, thoroughly, and accessibly. Others--some of them famous for their national coverage--largely ignore local representatives. The

analysis also confirms that only those incumbents or challengers in the most competitive races, and those who command huge sums of money, receive extensive coverage.

Mexican Americans with Moxie Frank P. Barajas 2021-08 In *Mexican Americans with Moxie* Frank P. Barajas argues that Chicanas and Chicanos of the 1960s and 1970s expressed politics distinct from the Mexican American generation that came of age in the decades prior. Barajas focuses on the citrus communities of Fillmore and Santa Paula and the more economically diversified and populated rural municipalities of Oxnard, Simi Valley, and Ventura, illustrating Ventura County's relationship to Los Angeles and El Movimiento's ties to suburbanization, freeway construction, and the rise of a high-tech and defense-industry corridor. *Mexican Americans with Moxie* devotes particular attention to cross-cultural dynamics that transcended space and generation. The residents of Ventura County became involved with national issues such as the Vietnam War, school desegregation, labor, and electoral politics. The actions of Black students at the community colleges of Moorpark and Ventura and other area

universities inspired Mexican American youth of Ventura County to assess their own activism. Mexican Americans with Moxie situates the Chicana-Chicano movement within the nation's struggle to achieve social justice. From this history, readers will gain a new appreciation for how leadership development spans generations and contributes to the identity formation of communities.

The Mexican Outsiders Martha Menchaca 2010-01-01 People of Mexican descent and Anglo Americans have lived together in the U.S. Southwest for over a hundred years, yet relations between them remain strained, as shown by recent controversies over social services for undocumented aliens in California. In this study, covering the Spanish colonial period to the present day, Martha Menchaca delves deeply into interethnic relations in Santa Paula, California, to document how the residential, social, and school segregation of Mexican-origin people became institutionalized in a representative California town. Menchaca lived in Santa Paula during the 1980s, and interviews with residents add a vivid human dimension to her book. She argues that social segregation in Santa Paula has evolved into a system of social apartness—that is, a cultural system controlled by Anglo Americans that designates the proper times and places where Mexican-origin people can socially interact with Anglos. This first historical ethnographic case study of a Mexican-origin community will be important reading across a spectrum of disciplines, including anthropology, sociology, race and ethnicity, Latino studies, and American culture.
