A Passion for Teaching Christopher Day 2004-04-01 This book is a celebration and an acknowledgement of the various forms of intellectual, physical, emotional and passionate endeavours in which teachers at their best engage. Christopher Day demonstrates that teachers with a passion for teaching are those who are committed, enthusiastic and intellectually and emotionally energetic in their work with children, young people and adults alike. Having this passion for helping pupils to learn has recently been identified as one of the four leadership characteristics mentioned in the HayMcBer Report on effective teachers. Day recognises that passionate teachers are aware of the challenge of the broader social contexts in which they teach, have a clear sense of identity and believe they can make a difference to the learning and achievement of all their pupils. Offering a refreshing and positive view, *A Passion for Teaching* is a contribution to understanding and improving the teaching profession and brings new insights to the work and lives of teachers. It is written for all teachers, teacher educators and student teachers who have a passion for education, who love learners, the learning life and the teaching life.

The Whales' Song Dyan Sheldon 2009-10-05 Enthralled by her grandmother's story of seeing and hearing whales singing in the sea long ago, Lilly hopes to see them herself and to hear their mysterious songs.

How People Learn National Research Council 2000-08-11 First released in the Spring of 1999, *How People Learn* has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain

that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do--with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. *How People Learn* examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Swiped Michele Martin Bossley 2006-09-01 Would-be detectives Trevor, Nick and Robyn are hot on the trail of a sandwich thief when they learn that more than food has been going missing at school. A valuable hockey book has been stolen from the library, and the kids worry that the librarian might lose her job if it isn't found. Who would steal a hockey book? Could it be Robyn's arch-nemesis and hockey enthusiast Clay? Or could it be Ms. Thorson, the Oiler fan teacher? The kids are determined to solve these mysteries even though their sleuthing efforts land them into trouble at every turn.

Dive Deeper George Cotkin 2012-09-06 *Moby-Dick* looms large - gargantuan in size, themes, symbols, and influence. Its deep dives, comedic interludes, adventurous journey, and surface effects demand a new approach. Instead of a traditional academic analysis, *Dive Deeper* grapples in novel fashion with this classic work. For each of the original's 135 chapters (along with Etymology, Extracts, and Epilogue), *Dive Deeper* has a corresponding brief chapter relating to themes and issues in the original. This permits *Dive Deeper* to follow the

flow of the original and to bring forth new appreciation for the novel, its characters, and its readers. At once creative and informative, Dive Deeper captures the up and down history of the novel, from its original reception to its resurrection in the 1890s, to its becoming the central work in the canon of American literature in the 1930s. Great books such as Moby-Dick live outside the confines of libraries. They occupy a central place in popular culture. Thus, Dive Deeper tracks the novel as it appears in various motion pictures (more than five major ones to date), comic routines and jokes, paintings, novels, songs (from rock to classical to rap), and in other cultural forms. In the process, Dive Deeper charts how, and why, this novel about a whale and its pursuer has captivated generations of American readers. And why it continues to do so today. Dive Deeper, then, is a creative and original way of approaching a great novel. Readers will gain information and a deeper understanding of an American classic and its place in popular culture.

Stuck Oliver Jeffers 2011-11-10 From the illustrator of the #1 smash The Day the Crayons Quit comes another bestseller--a giggle-inducing tale of everything tossed, thrown, and hurled in order to free a kite! When Floyd's kite gets stuck in a tree, he's determined to get it out. But how? Well, by knocking it down with his shoe, of course. But strangely enough, it too gets stuck. And the only logical course of action . . . is to throw his other shoe. Only now it's stuck! Surely there must be something he can use to get his kite unstuck. An orangutan? A boat? His front door? Yes, yes, and yes. And that's only the beginning. Stuck is Oliver Jeffers' most absurdly funny story since The Incredible Book-Eating Boy. Childlike in concept and vibrantly illustrated as only Oliver Jeffers could, here is a picture book worth rescuing from any tree.

Self-Regulation and the Common Core Marie C. White 2015-03-27 The Common Core State Standards for English Language Arts created new challenges for teachers and pre-service instructors. Self-regulated learning, using one's thoughts, feelings, and behaviors to reach goals, can help students become independent, self-directed learners. This book provides educators the support they need to apply the principles of self-regulated learning in their teaching for success with the Common Core. In this book, Marie C. White and Maria K. DiBenedetto present information on how to apply academic self-regulation by integrating two models: one which addresses how students develop self-regulatory competence, the other which focuses on the various processes within the three phases of self-regulated learning. In addition, *Self-Regulation and the Common Core* provides specific lesson plans for grades K-12, using the standards and the

integrated framework to promote higher order thinking and problem-solving activities.

Cetacean Societies Janet Mann 2000-06 "Part review, part testament to extraordinary dedication, and part call to get involved, *Cetacean Societies* highlights the achievements of behavioral ecologists inspired by the challenges of cetaceans and committed to the exploration of a new world."—from the preface by Richard Wrangham Long-lived, slow to reproduce, and often hidden beneath the water's surface, whales and dolphins (cetaceans) have remained elusive subjects for scientific study even though they have fascinated humans for centuries. Until recently, much of what we knew about cetaceans came from commercial sources such as whalers and trainers for dolphin acts. Innovative research methods and persistent efforts, however, have begun to penetrate the depths to reveal tantalizing glimpses of the lives of these mammals in their natural habitats. *Cetacean Societies* presents the first comprehensive synthesis and review of these new studies. Groups of chapters focus on the history of cetacean behavioral research and methodology; state-of-the-art reviews of information on four of the most-studied species: bottlenose dolphins, killer whales, sperm whales, and humpback whales; and summaries of major topics, including group living, male and female reproductive strategies, communication, and conservation drawn from comparative research on a wide range of species. Written by some of the world's leading cetacean scientists, this landmark volume will benefit not just students of cetology but also researchers in other areas of behavioral and conservation ecology as well as anyone with a serious interest in the world of whales and dolphins. Contributors are Robin Baird, Phillip Clapham, Jenny Christal, Richard Connor, Janet Mann, Andrew Read, Randall Reeves, Amy Samuels, Peter Tyack, Linda Weilgart, Hal Whitehead, Randall S. Wells, and Richard Wrangham.

Whale in a Fishbowl Troy Howell 2018-05-22 A moving, poetic story about a whale in captivity who longs for the ocean . . . because whales don't belong in fishbowls, do they? Wednesday is a whale who lives in a fishbowl smack dab in the middle of a city--it's the only home she's ever known. Cars whizz around her and people hurry past; even the sun and moon circle above. But if she leaps high enough out of her bowl, Wednesday can see it: a calm bit of blue off in the distance. When a girl in a paisley dress tells Wednesday "You belong in the sea," the whale starts to wonder, what is the sea? Readers will cheer--and get all choked up-- when, one day, Wednesday leaps higher than ever before and sets in motion a breathtaking chain of events that will carry her to her rightful

home. Touching, and ultimately uplifting, here is a story about a lonely creature longing to be free--and longing to find someone just like her. A Kirkus Reviews Best Book of 2018! A New York Public Library Best Book of 2018!
