Parental Involvement in Education Bridget Williams 2002 Parent involvement in their childrens education and school life was studied in England through a telephone survey of 2,109 households. Around 1 in 3 parents (29%) felt very involved in their childs school life, and primary school parents were more likely to feel this way than secondary school parents. Mothers were more likely to say that they were very involved than were fathers. Around 72% of all parents agreed that they wanted more involvement, and a third definitely agreed. Among the barriers to involvement, parents cited the competing demands in their lives such as work commitments, demands of other children, childcare difficulties, and lack of time generally. Almost all parents were happy with the schools attitude toward them, with a large majority finding the school welcoming (94%) and willing to involve them (84%). Parents particularly value face-to-face contact with teachers, but a significant minority thought that they would be labeled trouble makers if they talked too much. Parents were generally happy with the quality of written communications coming from schools, although a significant minority (27%) thought that the general information was spoiled by jargon. Many parents were not aware of the labels given to recent educational initiatives, and 35% did not recognize the term Home School Agreement, even though all had been invited to sign one. A Technical Appendix discusses sampling methods, and the survey questionnaire is attached. (Contains 12 figures, 26 tables, and 14 references.) (SLD)

Spanish Sentence Builders - a Lexicogrammar Approach Dylan Viñales 2020-05-05 Spanish Sentence Builders is a workbook aimed at beginner to pre-intermediate students co-authored by two modern

languages educators with over 40 years of extensive classroom experience between the two, both in the UK and internationally. This 'no-frills' book contains 19 units of work on very popular themes, jam-packed with graded vocabulary-building, reading, translation, retrieval practice and writing activities. Key vocabulary, lexical patterns and structures are recycled and interleaved throughout. Each unit includes: 1) a sentence builder modelling the target constructions; 2) a set of vocabulary building activities; 3) a set of narrow reading texts exploited through a range of tasks focusing on both the meaning and structural levels of the text; - a set of retrieval-practice translation tasks; 4) a set of writing tasks targeting essential micro-skills such as spelling, lexical retrieval, syntax, editing and communication of meaning. Based on the Extensive Processing Instruction (E.P.I.) principle that learners learn best from comprehensible and highly patterned input flooded with the target linguistic features, the authors have carefully designed each and every text and activity to enable the student to process and produce each item many times over. This occurs throughout each unit of work as well as in smaller grammar, vocabulary and question-skills micro-units located at regular intervals in the book, which aim at reinforcing the understanding and retention of the target grammar, vocabulary and question patterns.
