EBOOK: Teaching Secondary Mathematics with ICT Sue Johnston-Wilder 2004-10-16 "This is a book all mathematics teachers and teacher educators should read! It brings together a wealth of insights from a range of authors... The major issues confronting teachers of mathematics who wish to use ICT in different domains of mathematics are addressed in a clear and accessible way." Professor Celia Hoyles OBE, Dean of Research and Consultancy, Institute of Education, University of London Teaching Secondary Mathematics with ICT shows the reader how to use Information and Communication Technology (ICT) effectively to enhance the teaching of mathematics in the secondary school. The book explains which forms of technology can be used to improve mathematics teaching and learning, how to get started and where to go for further information. The first two chapters provide a useful introduction for those new to teaching mathematics with ICT. Further chapters cover topics including: ICT and the curriculum: number, algebra, geometry and statistics Making use of interactive whiteboards in the classroom Using the internet and video-conferencing to enhance teaching The book includes practical classroom scenarios and case studies (for example, the government-funded MathsAlive! Initiative), as well as discussions of general issues, such as the role of feedback and the use of ICT in whole-class teaching. It draws on current research and is supplemented by a linked web site, which provides access to demonstration copies of software and sample files. It also includes a directory of resources with lists of organisations, web sites, projects and further reading. Key reading for Education students specialising in Mathematics and all those teaching secondary mathematics, including non-specialists and those on professional development courses. Blade-Mounted Trailing Edge Flap Control for Bvi Noise Reduction National Aeronautics and Space Administration (NASA) 2018-07-23 Numerical procedures based on the 2-D and 3-D full potential equations and the 2-D Navier-Stokes equations were developed to study the effects of leading and trailing edge flap motions on the aerodynamics of parallel airfoil-vortex interactions and on the aerodynamics and acoustics of the more general self-generated rotor blade vortex interactions (BVI). For subcritical interactions, the 2-D results indicate that the trailing edge flap can be used to alleviate the impulsive loads experienced by the airfoil. For supercritical interactions, the results show the necessity of using a leading edge flap, rather than a trailing edge flap, to alleviate the interaction. Results for various

time dependent flap motions and their effect on the predicted temporal sectional loads, differential pressures, and the free vortex trajectories are presented. For the OLS model rotor, contours of a BVI noise metric were used to quantify the effects of the trailing edge flap on the size and directivity of the high/low intensity noise region(s). Average reductions in the BVI noise levels on the order of 5 dB with moderate power penalties on the order of 18 pct. for a four bladed rotor and 58 pct. for a two bladed rotor were obtained. Fundamental Constructs in Mathematics Education Sue Johnston-Wilder 2004-01-22 Fundamental Constructs in Mathematics Education is a unique sourcebook crafted from classic texts, research papers and books in mathematics education. Linked together by the editors' narrative, the book provides a fascinating examination of, and insight into, key constructs in mathematics education and how they link together. The choice of constructs is based on (some of) the many constructs which have proved fruitful in research and which have informed choices made by teachers. The book is divided into two parts: learning and teaching. The first part includes views about how people learn - from Plato to Dewey, as well as constructivism, activity theory and French didactiques. The second part includes extracts concerned with initiating, sustaining and bringing to a conclusion learners' work on mathematical tasks. Fundamental Constructs in Mathematics Education provides access to a wide range of constructs in mathematics education and orients the reader towards important original sources.

Children's Health in America Charles Richard King 1993 "What greater investment can a nation make than in the health of its children? Yet tragically, until the twentieth century nearly half of all children in the United States died before reaching adolescence." "The history of children's health in America - its evolution from the rudimentary ministrations of colonial times to the comprehensive care afforded children today - is a fascinating story, not just of medical advances but of society's changing perspectives and emphases, and of the roles religion, philosophy, and science have played in children's health care." "To understand the history of children's health in America, we must move beyond political campaigns, industrialization, and even the startling science of the physician and instead emphasize the home and the hearth as much more dramatic determinants of the health of American children," asserts Charles R. King, M.D., in this inaugural volume in Twayne's History of American Childhood Series. Arranged chronologically, the book provides an absorbing survey of children's health from colonial times to the present - from the influence of Rousseau to the focus on motherhood, from the rise of "pediatrists" to the growth of the "child saving" movement, and from the 1921 legislation heralding the government's first major involvement in children's health to the tremendous achievements of modern pediatric science and the growing recognition that children's health encompasses sociocultural as well as medical issues. Meticulously researched and illuminated with numerous quotations from child-rearing manuals, diaries, and letters, *Children's Health in America* will be of value to historians, health care professionals, students - and all those interested in the well-being of American children, past and present. Included in the volume are illustrations, a chronology, and suggestions for further reading."--BOOK JACKET. Title Summary field provided by Blackwell North America, Inc. All Rights Reserved

John James Audubon Richard Rhodes 2006-04-11 John James Audubon came to America as a dapper eighteen-year-old eager to make his fortune. He had a talent for drawing and an interest in birds, and he would spend the next thirty-five years traveling to the remotest regions of his new country—often alone and on foot—to render his avian subjects on paper. The works of art he created gave the world its idea of America. They gave America its idea of itself. Here Richard Rhodes vividly depicts Audubon's life and career: his epic wanderings; his quest to portray birds in a lifelike way; his long, anguished separations from his adored wife; his ambivalent witness to the vanishing of the wilderness. *John James Audubon: The Making of an American* is a magnificent achievement.

Royal Enfield Bullet Peter Henshaw 2020-10-26 Despite being one of the most successful motorcycles of all time, the Royal Enfield Bullet has had a very chequered history. Its story begins in the 1930s and by the 1950s it was at the height of its popularity in post-War Britain. Then it became a stalwart of the Indian Army and manufacture transitioned from Britain to India. The near-collapse of the Royal Enfield marque in the 1990s almost meant the end of this classic motorbike, but with the involvement of the Eicher Group from 2001 onwards, the updated Bullet generated new interest and renewed its original commercial success, just like a phoenix rising from the ashes. With over 200 photographs, this book describes the origins of the Royal Enfield company and the pre-war Bullets from 1932 and the relaunch of the Bullet in 1949 with its radical swinging-arm frame. Derivative models such as the 350 and 500, as well as those for competition and road are covered as well as specials such as diesels, V-twins, Egli and big-bore Bullets. The development story behind the lean-burn, electric-start and 5-speed updates is discussed as well as the UCE - the all-new Bullet from 2008 and the Classic and its design story. Finally, the evolution beyond the Bullet is covered which includes the Continental GT and Himalyan 650 twins.

Around the World on a Motorcycle Zoltan Sulkowsky 2013-09-01 The year was 1928 when two young Hungarians decided to travel around the world on a Harley-Davidson motorcycle with sidecar. Like Robert Fulton, whose circumnavigation of the globe is chronicled in his popular 1937 book *One Man Caravan*, Sulkowsky thought his was the first around-the-world journey on a motorcycle. This account of his trip with friend Gyula Bartha gives a very clear-eyed view of the world in the 1930s -- a world where the colonizing influence of Europe had affected much of Africa and Asia but not all. The two experienced the riches of sultans, witnessed remote cultures and extreme poverty in far-flung villages, travelled through wilderness with the ever-present danger of wild animals, and traversed roads of all descriptions. They dealt with mud, sand, extreme heat and cold, and rivers where the motorcycle had to be taken apart to cross in a small boat. This intelligent and engaging book, now in a paperback edition, offers a unique world view between the World Wars, flavored by the great diversity of cultures and the wide variety of human life that exists on the planet.

But there was more in the bounty than gems and gold, for the treasure was cursed, and in time it brought death to noble and peasant, war between Man and Dwarf, strife and destruction beyond reckoning. Now, generations later, as the conflict continues, the great Dragon Black Kalgath, in league with the Wizard Andrak, appears to avenge Sleeth's death and claim the Dragon-cursed hoard. Against this unholy alliance, two sworn enemies set forth to find a legendary long-lost weapon: a warhammer of

incalculable power that may be the only hope of victory. But neither the Warrior Maiden Elyn nor the Dwarf Thork is prepared for the dangers awaiting them on this quest....
