From Away Jeanne Martinson 2016-10-05 This book is written for managers and leaders who have struggled with understanding our newest immigration wave and how to move from just hiring immigrants to effective workplace integration. This book focuses on the four top source countries of immigrants to Canada: China, India, Pakistan and Philippines. It addresses key ways western and eastern societies see the world differently. It explores specific ways people from these societies are dissimilar to Canadian workplace culture in how they share information, give feedback, delegate, make decisions and manage conflict and schedules. This book explores those different perspectives as well as Canada's immigration history, snapshots of the four key countries, strategies around language and accent issues, and how to recruit within a cultural lens. Although the information is tagged to a specific country, recognize that this is a starting point for your communication with a staff member or colleague. Once we can unbundle the cultural blueprints of behaviour of our subordinates, colleagues, and ourselves - we can move from immigration to effective workplace integration.

Moong Over Microchips Venkat Iyer 2018-03-16 Venkat Iyer was living a fast-paced life in the IT world in Mumbai when he decided to stop and take a long, hard look at where he was headed. Disheartened by his stressful existence in the city, he decided to give it all up and take up organic farming in a small village near Mumbai. But it wasn't easy. With no experience in agriculture, his journey was fraught with uncertainty. He soon went from negotiating tough clients, strict deadlines and traffic to looking forward to his first bumper crop of moong. As he battled erratic weather conditions and stubborn farm animals, he discovered a world with fresh air and organic food, one where he could lead a more wholesome existence. At times hilarious, and other times profound, this book follows his extraordinary story.

Mathematics for Economics and Finance Martin Anthony 1996-07-13 Mathematics has become indispensable in the modelling of economics, finance, business and management. Without expecting any particular background of the reader, this book covers the following mathematical topics, with frequent reference to applications in economics and finance:

functions, graphs and equations, recurrences (difference equations), differentiation, exponentials and logarithms, optimisation, partial differentiation, optimisation in several variables, vectors and matrices, linear equations, Lagrange multipliers, integration, first-order and second-order differential equations. The stress is on the relation of maths to economics, and this is illustrated with copious examples and exercises to foster depth of understanding. Each chapter has three parts: the main text, a section of further worked examples and a summary of the chapter together with a selection of problems for the reader to attempt. For students of economics, mathematics, or both, this book provides an introduction to mathematical methods in economics and finance that will be welcomed for its clarity and breadth.

Social Entrepreneurship and Sustainable Development Archana Singh 2020-06-13 This volume discusses the seminal interface between social entrepreneurship and sustainable development along with their inter-linkages. It traces the role of social entrepreneurship and

innovations in societal transformation in creating sustainable societies, especially in developing nations. It explores how social entrepreneurship and enterprise is integral to the promise of fostering opportunities for socially disadvantaged groups (including the poor, women, and young people), as well as in addressing environmental and ecological issues apart from wealth creation. The book presents key concepts, case studies, and multiple innovative models involving social entrepreneurship, such as green financing, serial social entrepreneurship, sustainable livelihood creation, and well-being, in addition to highlighting global sustainable development goals of the United Nations. The chapters are organised under the broad themes of sustainability of the organisation, sustainability of the community, sustainability of the development, and sustainability of the community-organisation interface. They examine social change, social innovation, social enterprise, small and micro-enterprises, microfinance institutions, inclusive growth, education, productivity, physical health, waste management, energy retention, self-reliance, and corporate social responsibility. They contain emerging research issues in the field as well as critical assessments while bringing together theoretical and practitioners' perspectives. This book will be useful to scholars and researchers of development studies, social entrepreneurship, sustainable development, environmental studies, public policy, and political sociology. It will also greatly interest professionals from non-profit, corporate, and public sectors, other development practitioners, and international bodies.
