The Red Fog Over America William Carr 2021-09-11 At the age of twelve the author was thoroughly indoctrinated into the Bolshevik ideology by two revolutionary missionaries who traveled on the same ship with him out to the Orient in 1907. Unlike many others he didn't swallow the bait they offered him "Hook, Line, and Sinker". He decided to keep an open mind, and to investigate matters thoroughly, before reaching any conclusions. His investigations and studies of all angles of the International Conspiracy have taken him to nearly every country in the world. Commander Carr has had a distinguished naval career. During WWI he served as Navigating Officer of H.M. Submarines. In WWII he was Naval Control Officer for the St. Lawrence; then Staff Officer Operations at Shelbourne, N.S.; then Senior Naval Officer at Goose Bay, Labrador. As an Officer on the staff of Commodore Reginald Brock he organized the 7th Victory Loan for the twenty-two Royal Canadian Naval Training Divisions. As an author he has previously published seven books. Some were specially bound for inclusion in the Royal Library; The Library of The Imperial War Museum; and the Sir Millington Drake Library (which is bequeathed to Eton College), and the Braille Library for the Blind. Commander Carr is known to many Canadians who have attended his public lectures. He warned people of the existence of an International Conspiracy. He foretold that the conspirators would, unless checked, drag the World into another Global War. Commander Carr is determined to inform as many people as possible regarding the Evil Forces which adversely affect all our lives, and the lives of our children. His book will be an eye-opener to parents, clergymen, teachers, students, statesmen,

politicians, and labor leaders.

Making Sense of Data II Glenn J. Myatt 2009-03-04 A hands-on guide to making valuable decisions from data using advanced data mining methods and techniques This second installment in the Making Sense of Data series continues to explore a diverse range of commonly used approaches to making and communicating decisions from data. Delving into more technical topics, this book equips readers with advanced data mining methods that are needed to successfully translate raw data into smart decisions across various fields of research

including business, engineering, finance, and the social sciences. Following a comprehensive introduction that details how to define a problem, perform an analysis, and deploy the results, Making Sense of Data II addresses the following key techniques for advanced data analysis: Data Visualization reviews principles and methods for understanding and communicating data through the use of visualization including single variables, the relationship between two or more variables, groupings in data, and dynamic approaches to interacting with data through graphical user interfaces. Clustering outlines common approaches to clustering data sets and provides detailed explanations of methods for determining the distance between observations and procedures for clustering observations. Agglomerative hierarchical clustering, partitioned-based clustering, and fuzzy clustering are also discussed. Predictive Analytics presents a discussion on how to build and assess models, along with a series of predictive analytics that can be used in a variety of situations including principal component analysis, multiple linear regression, discriminate analysis, logistic regression, and Naïve Bayes. Applications demonstrates the current uses of data mining across a wide range of industries and features case studies that illustrate the related applications in real-world scenarios. Each method is discussed within the context of a data mining process including defining the problem and deploying the results, and readers are provided with guidance on when and how each method should be used. The related Web site for the series (www.makingsenseofdata.com) provides a hands-on data analysis and data mining experience. Readers wishing to gain more practical experience will benefit from the tutorial section of the book in conjunction with the Traceist™ software, which is freely available online.
