**Wider than the Sky** Katherine Rothchild 2021-01-19 In the wake of sudden tragedy, twin sisters uncover a secret that rips open their world. Katherine Rothchild explores the pain and power of forgiveness in a stunning debut novel that will shatter your heart and piece it back together, one truth at a time. Sixteen-year-old Sabine Braxton doesn't have much in common with her identical twin, Blythe. When their father dies from an unexpected illness, each copes with the loss in her own way—Sabine by “poeting” (an uncontrollable quirk of bursting into poetry at inappropriate moments) and Blythe by obsessing over getting into MIT, their father's alma mater. Neither can offer each other much support . . . at least not until their emotionally detached mother moves them into a ramshackle Bay Area mansion owned by a stranger named Charlie. Soon, the sisters unite in a mission to figure out who Charlie is and why he seems to know everything about them. They make a life-changing discovery: their parents were hiding secrets about their sexual identities. The revelation unravels Sabine's world, while practical Blythe seems to take everything in stride. Once again at odds with her sister, Sabine chooses to learn all she can about the father she never knew. Ultimately, she must decide if she can embrace his last wish for a family legacy—even if it means accepting a new idea of what it means to be a family.

*The Sacred Books of the East - Buddhist Mahayana Texts* Max F. Muller 2019-04-17 "The Sacred Books of the East" contains 50 volumes of Asian religious texts translated into English, first published between 1879 and 1910. The texts span a wide range of religions including Taoism, Hinduism, Confucianism, Zoroastrianism, and more. This volume concentrates on Buddhist and the Mahayana texts in particular. Contents include: "The Buddha-karita of Asvaghosha: Books I-XVII", "Index of Proper Names", "Notes and Corrections", "The Larger Sukhavati-Vyuha", "The Smaller Sukhavati-Vyuha", "The Vagrakkhedika", "The Larger Pragna-Paramita-Hridaya-Sutra", "The Smaller Pragna-Paramita-Hridaya-Sutra", etc. Friedrich Max Müller (1823 - 1900) was a German Orientalist and philologist famous for being amongst the founders of Indian studies in western academia. Many vintage books such as this are increasingly scarce and expensive. We are republishing this classic volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author.

*Bless the Birds* Susan J. Tweit 2021-04-27 Writer Susan Tweit and her economist-turned-sculptor husband Richard Cabe had just settled into their version of a “good life” when Richard saw thousands of

birds one day—harbingers of the brain cancer that would kill him two years later. This compelling and intimate memoir chronicles their journey into the end of his life, framed by their final trip together, a 4,000-mile-long delayed honeymoon road trip. As Susan and Richard navigate the unfamiliar territory of brain cancer treatment and learn a whole new vocabulary—craniotomies, adjuvant chemotherapy, and brain geography—they also develop new routines for a mindful existence, relying on each other and their connection to nature, including the real birds Richard enjoys watching. Their determination to walk hand in hand, with open hearts, results in profound and difficult adjustments in their roles. *Bless the Birds* is not a sad story. It is both prayer and love song, a guide to how to thrive in a world where all we hold dear seems to be eroding, whether simple civility and respect, our health and safety, or the Earth itself. It's an exploration of living with love in a time of dying—whether personal or global—with humor, unflinching courage, and grace. And it is an invitation to choose to live in light of what we love, rather than what we fear.

World Social Report 2021 2021-05-20 The World Social Report 2021 points to new directions in which rural development strategies need to be reconsidered. It offers strategic principles, programs of action, and a set of concrete policies that can be combined to devise effective strategies to help realize the potential of rural development and achieve the SDGs. Reexamining the narrow view of rural development, it expands the discussion to include the role of development in achieving the wider set of SDGs. In doing so, it pays particular attention to the interaction of rural development with SDG 6 (clean water and sanitation), SDG 8 (economic growth and decent work), SDG 9 (infrastructure), SDG 11 (sustainable communities), SDG 13 (climate change), SDG 14 (life below water) and SDG 15 (life on land). The interlinkages of all these Goals suggest that there exist potential synergies between rural development and sustainable efforts in many other directions.

**The Dynamics of Non-Performing Loans during Banking Crises: A New Database** Mr.Anil Ari 2019-12-06

This paper presents a new dataset on the dynamics of non-performing loans (NPLs) during 88 banking crises since 1990. The data show similarities across crises during NPL build-ups but less so during NPL

resolutions. We find a close relationship between NPL problems—elevated and unresolved NPLs—and the severity of post-crisis recessions. A machine learning approach identifies a set of pre-crisis predictors of NPL problems related to weak macroeconomic, institutional, corporate, and banking sector conditions. Our findings suggest that reducing pre-crisis vulnerabilities and promptly addressing NPL problems during a crisis are important for post-crisis output recovery.

**Global Economic Prospects, June 2021** World Bank 2021-08-03 The world economy is experiencing a very strong but uneven recovery, with many emerging market and developing economies facing obstacles to vaccination. The global outlook remains uncertain, with major risks around the path of the pandemic and the possibility of financial stress amid large debt loads. Policy makers face a difficult balancing act as they seek to nurture the recovery while safeguarding price stability and fiscal sustainability. A comprehensive set of policies will be required to promote a strong recovery that mitigates inequality and enhances environmental sustainability, ultimately putting economies on a path of green, resilient, and inclusive development. Prominent among the necessary policies are efforts to lower trade costs so that trade can once again become a robust engine of growth. This year marks the 30th anniversary of the Global Economic Prospects. The Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

Colonial Situations George W. Stocking 1991-10-01 As European colonies in Asia and Africa became independent nations, as the United States engaged in war in Southeast Asia and in covert operations in South America, anthropologists questioned their interactions with their subjects and worried about the political consequences of government-supported research. By 1970, some spoke of anthropology as “the child of Western imperialism” and as “scientific colonialism.” Ironically, as the link between anthropology and colonialism became more widely accepted within the discipline, serious interest in examining the history of anthropology in colonial contexts diminished. This volume is an effort to initiate a critical historical consideration of the varying “colonial situations” in which (and out of which) ethnographic knowledge essential to anthropology has been produced. The essays comment on ethnographic work from the middle of the nineteenth century to nearly the end of the twentieth, in regions from Oceania through southeast Asia, the Andaman Islands, and southern Africa to North and South America. The “colonial situations” also cover a broad range, from first contact through the establishment of colonial power, from District Officer administrations through white settler regimes, from internal colonialism to international mandates, from early “pacification” to wars of colonial liberation, from the expropriation of land to the defense of ecology. The motivations and responses of the anthropologists discussed are equally varied: the romantic resistance of Maclay and the complicity of Kubary in early colonialism; Malinowski’s salesmanship of academic anthropology; Speck’s advocacy of Indian land rights; Schneider’s grappling with the ambiguities of rapport; and Turner’s facilitation of Kaiapo cinematic activism. “Provides fresh insights for those who care about the history of science in general and that of anthropology in particular, and a valuable reference for professionals and graduate students.”—Choice “Among the most distinguished publications in anthropology, as well as in the history of social sciences.”—George Marcus, *Anthropologica*

**Responses to Language Endangerment** Elena Mihas 2013-11-15 This volume further complicates and advances the contemporary perspective on language endangerment by examining the outcomes of the most commonly cited responses to language endangerment, i.e. language documentation, language revitalization, and training. The present collection takes stock of many complex and pressing issues, such as the assessment of the degree of language endangerment, the contribution of linguistic scholarship to language revitalization programs, the creation of successful language reclamation programs, the emergence of languages that arise as a result of revitalization efforts after interrupted transmission, the ethics of fieldwork, and the training of field linguists and language educators. The volume's case studies provide detailed personal accounts of fieldworkers and language activists who are grappling with issues of language documentation and revitalization in the concrete physical and socio-cultural settings of native speaker communities in different regions of the world.

**The New Deal** Kiran Klaus Patel 2017-05-09 The New Deal: A Global History provides a radically new interpretation of a pivotal period in US history. The first comprehensive study of the New Deal in a global context, the book compares American responses to the international crisis of capitalism and democracy during the 1930s to responses by other countries around the globe—not just in Europe but also in Latin America, Asia, and other parts of the world. Work creation, agricultural intervention, state planning, immigration policy, the role of mass media, forms of political leadership, and new ways of ruling America's colonies—all had parallels elsewhere and unfolded against a backdrop of intense global debates. By avoiding the distortions of American exceptionalism, Kiran Klaus Patel shows how America's reaction to the Great Depression connected it to the wider world. Among much else, the book explains why the New Deal had enormous repercussions on China; why Franklin D. Roosevelt studied the welfare schemes of Nazi Germany; and why the New Dealers were fascinated by cooperatives in Sweden—but ignored similar schemes in Japan. Ultimately, Patel argues, the New Deal provided the institutional scaffolding for the construction of American global hegemony in the postwar era, making this history essential for understanding both the New Deal and America's rise to global leadership.

**100 Days of Sunlight** Abbie Emmons 2019-08-07 When 16-year-old poetry blogger Tessa Dickinson is involved in a car accident and loses her eyesight for 100 days, she feels like her whole world has been turned upside-down. Terrified that her vision might never return, Tessa feels like she has nothing left to be happy about. But when her grandparents place an ad in the local newspaper looking for a typist to help

Tessa continue writing and blogging, an unlikely answer knocks at their door: Weston Ludovico, a boy her age with bright eyes, an optimistic smile...and no legs. Knowing how angry and afraid Tessa is feeling, Weston thinks he can help her. But he has one condition -- no one can tell Tessa about his disability. And because she can't see him, she treats him with contempt: screaming at him to get out of her house and never come back. But for Weston, it's the most amazing feeling: to be treated like a normal person, not just a sob story. So he comes back. Again and again and again. Tessa spurns Weston's "obnoxious optimism", convinced that he has no idea what she's going through. But Weston knows exactly how she feels and reaches into her darkness to show her that there is more than one way to experience the world. As Tessa grows closer to Weston, she finds it harder and harder to imagine life without him -- and Weston can't imagine life without her. But he still hasn't told her the truth, and when Tessa's sight returns he'll have to make the hardest decision of his life: vanish from Tessa's world...or overcome his fear of being seen. 100 Days of Sunlight is a poignant and heartfelt novel by author Abbie Emmons. If you like sweet contemporary romance and strong family themes then you'll love this touching story of hope, healing, and getting back up when life knocks you down.

*Psychosurgery* Marc Lévêque 2014-02-18 Psychosurgery, or the surgical treatment of mental disorders, has enjoyed a spectacular revival over the past ten years as new brain stimulation techniques have become available. Neuromodulation offers new possibilities for the treatment of psychiatric disorders such as depression, obsessive-compulsive disorder (OCD), addiction, eating disorders and autism. This work presents the history of this unique specialty and investigates current techniques and ethical challenges. With a wealth of illustrations and detailed anatomical diagrams, it provides essential information for medical practitioners, as well as anyone else interested in the fascinating advances being made in neuroscience today. « I like the book as it provides a very nice overview of psycho- surgery in general. It is easy to understand for any (para)medical practitioner, but even specialists in the field may learn new things. They may also enjoy looking the well-known and less-known figures which illustrate the book. » Professor Bart Nuttin « Reading this book is like reading an anthology, or rather an encyclopaedia of the field of psychiatric surgery, spanning more than a century. This is a work with an unprecedented degree of erudition and knowledge, and the subject is presented in a didactic, scholar, and scientific manner, and is extensively referenced and illustrated. If only one book is to be read by anybody interested in this field,

regardless of specialty, this is The Book to read. » Professor Marwan Hariz
