Terrence Malick Lloyd Michaels 2009 For a director who has made only four feature films over three decades, Terrence Malick has sustained an extraordinary critical reputation as one of America's most original and independent filmmakers. In this book, Lloyd Michaels analyzes each of Malick's four features in depth, emphasizing both repetitive formal techniques such as voiceover and long lens cinematography as well as recurrent themes drawn from the director's academic training in modern philosophy and American literature. Michaels explores Malick's synthesis of the romance of mythic American experience and the aesthetics of European art film. He performs close cinematic analysis of paradigmatic moments in Malick's films: the billboard sequence in *Badlands*, the opening credits in *Days of Heaven*, the philosophical colloquies between Witt and Welsh in *The Thin Red Line*, and the epilogue in *The New World*. This richly detailed study also includes the only two published interviews with Malick, both in 1975 following the release of his first feature film.

2015-05-10 The volume is a theoretical and practical manual for thermographic inspections in electrical and industrial field. It contains 230 pages of theory and practical informations about guidelines, criteria, applications in electrical and industrial surveys. In the early chapters the book provides the physical basis of thermography, the technical characteristics of the cameras and their meanings, and the basic measurement techniques (emissivity, reflected ambient temperature, transmissivity). We then move on to the examination of the main applications in the electrical and industrial, where thermography is covering an increasingly important as a technique of predictive maintenance. Through it possible investigations into the electrical connections, phase imbalances, overloads, loss of isolation and physical damage to the conductors, the normal plants in the low voltage transformer substations. Are also possible investigations on electric motors, where you can find not only the loss of insulation in the windings but also imbalances and other mechanical problems. Other applications, of growing interest, concern photovoltaic systems and data centers. In other industries we examine the applications in the chemical and petrochemical industries, and in general in industrial process control. The book contains many pictures of real cases and references to foreign technical standards, with criteria for classifying the severity of thermal anomalies and mathematical examples of application: in the US thermography technique has been recognized as valid by the NFPA (National Fire Protection Agency) for preventing fires of electrical origin, and the major insurance companies promote the application of thermography surveys. The Sandman and Other Tales of Hoffmann Ernst Theodor Amadeus Hoffmann 2010-01-15 Traditionally he is a character in many children's stories. He is said to sprinkle sand or dust on or into the eyes of the child at night to bring on dreams and sleep. Hoffmann (1776-1822) created an inverse idea of the lovable character in *The Sandman*, which showed how sinister such a character could be made. The protagonist of the story associates this nightmarish creature with the sinister figure of his father's associate Coppelius.

San Alvaro Alessandro Vicenzi 2020-02-04 Horror - romanzo (244 pagine) - L'orrore striscia sulle piste del vecchio West. Per decenni la vecchia missione di San Alvaro è stata il covo di padre Godard, un leggendario bandito che ne ha fatto il rifugio per tutti i criminali disposti ad accettare la sua autorità. Ma ora, vecchio e malato, Godard è disposto a qualsiasi cosa per sfuggire alla morte, anche a stringere un patto con l'entità che, dalle viscere della Terra, gli offre la promessa concreta di vita eterna. Per fermarlo, banditi, sciamani riluttanti, pistoleri tornati dalla morte, militari e misteriosi inviati del governo statunitense saranno costretti a unire le proprie forze in una sfida disperata contro l'orrore e la follia. Visionario e adrenalinico, San Alvaro è un weird western che rivisita in chiave moderna le dime novel che offrivano ai lettori l'immagine di un West epico e immaginario. Alessandro Vicenzi (Genova, 1979) lavora come redattore in una casa editrice. The Dawn of All Robert Hugh Benson 1911

Gordo Jaime Cortez 2021-08-10 Shedding profound natural light on the inner lives of migrant workers, Jaime Cortez's debut collection ushers in a new era of American literature that gives voice to a marginalized generation of migrant workers in the West. The first-ever collection of short stories by Jaime Cortez, *Gordo* is set in a migrant workers camp near Watsonville, California in the 1970s. A young, probably gay, boy named Gordo puts on a wrestler's mask and throws fists with a boy in the neighborhood, fighting his own tears as he tries to grow into the idea of manhood so imposed on him by his father. As he comes of age, Gordo learns about sex, watches his father's drunken fights, and discovers even his own documented Mexican-American parents are wary of illegal migrants. Fat Cookie, high schooler and resident artist, uses tiny library pencils to draw huge murals of graffiti flowers along the camp's blank walls, the words "CHICANO POWER" boldly lettered across, until she runs away from home one day with her mother's boyfriend, Manny, and steals her mother's Panasonic radio for a final dance competition among the camp kids before she disappears. And then there are Los Tigres, the perfect pair of twins so dark they look like indios, Pepito

and Manuel, who show up at Gyrich Farms every season without fail. Los Tigres, champion drinkers, end up assaulting each other in a drunken brawl, until one of them is rushed to the emergency room still slumped in an upholstered chair tied to the back of a pick-up truck. These scenes from Steinbeck Country seen so intimately from within are full of humor, family drama, and a sweet frankness about serious matters - who belongs to America and how are they treated? How does one learn decency, when laborers, grown adults, must fear for their lives and livelihoods as they try to do everything to bring home a paycheck? Written with balance and poise, Cortez braids together elegant and inviting stories about life on a California camp, in essence redefining what all-American means.

Central Station Lavie Tidhar 2016-05-10 An NPR Best Book of 2016 An Amazon Featured Best Science Fiction & Fantasy Book A Guardian Best SF & Fantasy Book of 2016 Longlist, British Science Fiction Award 2016, Best Novel 2017 Arthur C. Clarke Award nominee "It's all of science fiction distilled into a single book." —Warren Ellis, author of Transmetropolitan and Gun Machine A worldwide diaspora has left a quarter of a million people at the foot of a space station. Cultures collide in real life and virtual reality. The city is literally a weed, its growth left unchecked. Life is cheap, and data is cheaper. When Boris Chong returns to Tel Aviv from Mars, much has changed. Boris's ex-lover is raising a strangely familiar child who can tap into the datastream of a mind with the touch of a finger. His cousin is infatuated with a robotnik—a damaged cyborg soldier who might as well be begging for parts. His father is terminally-ill with a multigenerational mind-plague. And a hunted data-vampire has followed Boris to where she is forbidden to return. Rising above them is Central Station, the interplanetary hub between all things: the constantly shifting Tel Aviv; a powerful virtual arena, and the space colonies where humanity has gone to escape the ravages of poverty and war. Everything is connected by the Others, powerful alien entities who, through the Conversation—a shifting, flowing stream of consciousness—are just the beginning of irrevocable change. At Central Station, humans and machines continue to adapt, thrive...and even evolve.

The Ministry of Thunder Davide Mana 2014-12-15 Shanghai, 1936. Felice Sabatini is just a mechanic, working on Italian aircraft in China. He isn't looking for trouble, much less interested in getting caught up in a conspiracy against China, Japan, and Germany. Unfortunately for him, that's exactly what happens. Three different factions are after an ancient artifact and the mystical power it controls. Power that, if it falls into the wrong hands, could end up destroying the very world as we know it. Felice knows nothing of immortals, fox women, ninjas or dragons, never mind the Ministry of Storms. He is a rational man, after all. But before this journey is over he will be called upon to face all of that, never mind the power of ancient Chinese magic and a menace from Beyond Time. From the crowded streets of Shanghai to the empty stretches of the Desert of Inescapable Death, *Ministry of Thunder* is an explosive mix of Oriental Fantasy and New Pulp.

The Doll's Alphabet Camilla Grudova 2017-10-17 "This doll's eye view is a total delight and surveys a world awash with shadowy wit and exquisite collisions of beauty and the grotesque." —Helen Oyeyemi, author of *Boy, Snow, Bird* "Down to its most particular details, *The Doll's Alphabet* creates an individual world—a landscape I have never encountered before, which now feels like it was been waiting to be captured, and waiting to captivate, all along." —Sheila Heti, author of *How Should a Person Be* "Marvellous. Grudova understands that the best writing has to pull off the hardest aesthetic trick—it has to be both memorable

and fleeting." —Deborah Levy, author of *Hot Milk Dolls*, sewing machines, tinned foods, mirrors, malfunctioning bodies—by constantly reinventing ways to engage with her obsessions and motifs, Camilla Grudova has built a universe that's highly imaginative, incredibly original, and absolutely discomfiting. The stories in *The Doll's Alphabet* are by turns child-like and naive, grotesque and very dark: the marriage of Margaret Atwood and Angela Carter. Camilla Grudova lives in Toronto. She holds a degree in Art History and German from McGill University, Montreal. Her fiction has appeared in *The White Review* and *Granta*.

Dome Sweet Home Carmella Gonnella 2000-12-01 If you are thinking about building a new home & think you may like living in the round, then this book is for you. Written from first hand experience, two of the authors each live in a dome home. The third author, in the business of remodeling conventional type homes, responded to the distress call during the building of a dome. The result: a very informative book, easy & delightful to read. Aside from a very brief history of domes as residences & a comparative description of the three primary modern dome types, the focus of the book is the Monolithic Dome: its characteristics, basic construction, choices in shapes, exterior design elements. The remaining chapters cover the equally practical considerations on architects, contractors & contracting, building in a rural area, financing & insurance. Tips & red alerts are sprinkled throughout the book. This book is a one-stop introduction to essential considerations to arm the reader before, not after the fact, with information & suggestions. The text is amply referenced & illustrated.

The Middle Ages Mikael Eskelner 2019-10-31 When we talk about the Middle Ages, we talk about a historical period that extends from the 5th century to the 15th century. Ten centuries of history that begins with the fall of the Roman Empire of the West, in the year 476 A.D. and that is terminated at the end of the fifteenth century, in 1492, with the discovery of the American continent. The Middle Ages was a period of European history that left deep traces on the continent. Marked by important historical events, the beginning and end of this period was marked by major cultural, political, religious, social and economic changes, becoming one of the most fascinating periods in history.

Srdn - From Bronze and Darkness Andrea Atzori 2017-04-20 The year is 1278 B.C. and the Mediterranean Sea is shared among the most powerful civilizations of ancient times. Greeks, Egyptians, and Phoenicians sail from port to port, ready to fight to protect their trade from the "Sea People," marauders who loot and disappear like ghosts. Among them are the fierce Shardan, who come from the "Island of Towers," from fortresses of basalt stone called nuraghes. These rise up all over the Shardan's land and, since the dawn of time, hide a curse feared by the people of the Mediterranean: the Island is the gateway to the netherworld. The Shardan live as hell-keepers, offering their loot to the Gods who protect their position. Now they are in Egypt, ready to wage war against the pharaohs when a messenger arrives from the netherworld with a warning: the Mamuthone demons have awakened.

extensive archival research in the United States and Italy, Giorgio Bertellini's work shows how their popularity, both political and erotic, largely depended on the efforts of public opinion managers, including publicists, journalists, and even ambassadors. Beyond the democratic celebrations of the Jazz Age, the promotion of their charismatic masculinity through spectacle and press coverage inaugurated the now-familiar convergence of popular celebrity and political authority. This is the first volume in the new Cinema Cultures in Contact series, coedited by Giorgio Bertellini, Richard Abel, and Matthew Solomon.
