**Handbook of Decentralised Governance and Development in India** D. Rajasekhar 2021-08-24 This handbook examines 25 years of decentralised governance and development in India. It provides a historical overview of developments since the introduction of decentralisation reforms (73rd and 74th Constitutional Amendment Acts) and critically assesses the measures initiated to strengthen decentralised institutions and deepen grassroots democracy. It also discusses the status of service delivery and identifies the issues and challenges involved in achieving development at the local level. The volume studies themes such as the devolution of powers in India, administrative and fiscal

decentralisation, decentralised planning, Panchayats in scheduled areas, the sociological aspects of decentralisation, caste, gender and local democracy, capacity building, ICT for local governance, urban local governance, workfare and decentralisation, and decentralised natural resource management. It also looks at Panchayati Raj institutions from a Gandhian perspective. The first of its kind, this handbook will be an essential read for scholars and researchers of decentralisation and development, development studies, fiscal decentralisation, political studies, political sociology, Indian politics, Indian government, public policy and governance, political economy, South Asian studies, and South Asian politics.

The Exact Opposite of Okay Laura Steven 2019-06-11 “Laura Steven simultaneously destroyed the patriarchy and made me laugh so hard I choked. I will protect Izzy O'Neill with my life.” —Becky Albertalli, author of SIMON VS. THE HOMO SAPIENS AGENDA Bitingly funny and shockingly relevant, *The Exact Opposite of Okay* is a bold, brave, and necessary read for fans of Louise O'Neill and Jennifer Mathieu. Eighteen-year-old Izzy O'Neill knows exactly who she is—a loyal friend, an aspiring comedian, and a person who believes that milk shakes and Reese's peanut butter cups are major food groups. But after she's caught in a compromising position with the son of a politician, it seems like everyone around her is eager to give her a new label: slut. Izzy is certain that the whole thing will blow over and she can get back to worrying about how she doesn't reciprocate her best friend Danny's feelings for her and wondering how she is ever going to find a way out of their small town. Only it doesn't. And while she's used to laughing her way out of any situation, as she finds herself first the center of high school gossip and then in the middle of a national scandal, it's hard even for her to find humor in the situation. Izzy may be determined not to let anyone else define who she is, but that proves easier said than done when it seems like everyone has something to say about her.

**Carbohydrate Antigens** Per J. Garegg 1993 Covers recent developments in carbohydrate research in the chemical and biomedical arenas. Includes coverage of synthesis of artificial antigens and vaccines, structural determination of antigens, and molecular modelling of antigens interacting with antibodies and lectins. Also examines various biological, immunological and medical aspects. An opening chapter discusses the work of Dr. Michael Heidelberger. Valuable reading for carbohydrate, medicinal/pharmaceutical, and organic chemists and biochemists interested in biomedical research.

*Advancements in Tumor Immunotherapy and Cancer Vaccines* Hilal Arnouk 2012-02-03 Harnessing the potential of the human body's own immune system to attack malignant tumor cells has been the goal of many scientific investigators in recent years, with advances in cancer biology and immunology enabling cancer immunotherapy to become a reality. World-class bench and clinical researchers have joined forces to collaborate and review current developments and trends in cancer immunology for the purposes of this book, and the result is a promising review of contemporary clinical treatments. In each chapter the authors present the scientific basis behind such therapeutic approaches, including cancer vaccines with special focus on prostate cancer, melanoma and novel approaches utilizing both innate and adaptive immune responses.

Understanding Violence Against Women in Africa Francis Onditi 2021 This textbook provides students across Social Sciences, Humanities, Politics, and International Studies with an in-depth understanding of the issues, policies, and strategies for addressing the symptoms and root causes of violence against women (VAW) in sub-Saharan Africa. This text uses the United Nations Security Councils Resolution 1325 (UNSCR 1325) on Women, Peace and Security in Eastern and Southern Africa as a framework to present the causes and impacts of VAW and to trace the journey of sub-Saharan African countries toward gender equality. It also provides an overview of the policy and legislative frameworks that underpin the progress, challenges, and achievements of addressing VAW based on four key pillars: prevention, protection, participation, and relief and recovery. Chapters provide a wealth of knowledge, as the book draws on academic literature; national, regional, and international legislations; and data collected from field research, and makes use of end-of-chapter discussion questions and quick study guides. Students will come away equipped with the tools, resources, and knowledge necessary to address and fix VAW in sub-Saharan Africa and beyond. Francis Onditi heads the School of International Relations and Diplomacy in Riara University, Kenya and was recently enlisted as a Distinguished Author and Professor of Research at the Institute of Intelligent Systems, University of Johannesburg, South Africa. He is the 2019 recipient of the AISA Fellowship awarded by the Human Sciences Research Council (HSRC), South Africa. He is a widely published pan-African peace researcher with numerous research papers in peer reviewed journals. He has authored/coedited 3 books including Conflictology: Systems, Institutions and Mechanisms in Africa. Josephine Odera is the immediate former Director of Africa Centre for Transformative & Inclusive Leadership (ACTIL). She formerly served as Regional Director, West and Central Africa, UN Women; Regional Advisor, Leadership & Governance at the United Nations Women Regional Office for East and Southern Africa; and taught at the University of Nairobi's Institute of Diplomacy & International Studies

(IDIS). She currently serves as a conflict & mediation expert in various African countries.

*Zooplankton Ecology* Maria Alexandra Teodosio 2020-11-20 This book aims at providing students and researchers an advanced integrative overview on zooplankton ecology, covering marine and freshwater organisms, from microscopic phagotrophic protists, to macro-jellyfishes and active fish larvae. The first book section addresses zooplanktonic organisms and processes, the second section is devoted to zooplankton spatial and temporal distribution patterns and trophic dynamics, and the final section is dedicated to emergent methodological approaches (e.g., omics). Book chapters include comprehensive synthesis, observational and manipulative studies, and sediment-based analysis, a vibrant imprint of benthic-pelagic coupling and ecosystem connectivity. Most chapters also address the impacts of anticipated environmental changes (e.g., warming, acidification).

**Principles and Practice of Ovarian Tissue Cryopreservation and Transplantation** Kutluk Oktay 2022-05-20 Principles and Practice of Ovarian Tissue Cryopreservation and Transplantation provides methods and techniques of ovarian tissue harvesting and cryopreservation, including instructional videos. This book will benefit a wide audience, guiding infertility specialists, fellows, residents, reproductive surgeons, reproductive endocrinologists, pediatric surgeons, embryologists, infertility nurses and gynecologists. Ovarian cryopreservation and transplantation is rapidly gaining acceptance as a successful and established fertility preservation strategy in cancer patients and beyond. Unlike other fertility preservation strategies, it can be performed in children as well as adults, and can be helpful in restoring natural ovarian function and fertility, hence this is a welcomed resource on the topic. Provides instructional videos, materials and an equipment list for ovarian tissue harvesting and cryopreservation, along with protocols for ovarian tissue cryopreservation thawing and transplantation Presents instructional video coverage of ovarian tissue cryopreservation for use at fertility centers around the globe Fulfills a specific niche in the literature, providing a comprehensive reference on ovarian tissue freezing and transplantation Includes a foreword written by a cancer survivor who successfully received this procedure

*Reproductive Biology of Teleost Fishes* Robert J. Wootton 2014-12-03 Reproductive Biology of Teleost Fishes is the first integrated review of the reproductive biology of the bony fishes, which are the most species-rich and diversified group of vertebrates. Teleosts display remarkable variation in their modes of

reproduction, and this volume is intended to provide a framework for understanding the remarkable reproductive diversity of this group. It describes their reproductive biology using, wherever possible, phylogenetic analyses and life-history theory as a means to interpret the information. The book addresses the genetic, physiological, behavioural, ecological, evolutionary and applied aspects of teleost reproduction in a comparative framework that emphasises the adaptive basis of reproductive diversity. Reproductive Biology of Teleost Fishes provides a comprehensive synthesis of fish reproduction that will be of great interest to life scientists, particularly ecologists, evolutionary biologists, physiologists and advanced undergraduates, postgraduates and research workers requiring a comprehensive overview of fish reproduction. The book is suitable for courses in fish biology and ecology, reproductive physiology and reproductive genetics. It also addresses applied questions and will be of value for courses on fisheries science and aquaculture. Libraries in all universities and research establishments where biological sciences, fisheries science and aquaculture are studied and taught should have several copies of this important book on their shelves.

**Encyclopedia of Immunobiology** 2016-04-27 Encyclopedia of Immunobiology provides the largest integrated source of immunological knowledge currently available. It consists of broad ranging, validated summaries on all of the major topics in the field as written by a team of leading experts. The large number of topics covered is relevant to a wide range of scientists working on experimental and clinical immunology, microbiology, biochemistry, genetics, veterinary science, physiology, and hematology. The book is built in thematic sections that allow readers to rapidly navigate around related content. Specific sections focus on basic, applied, and clinical immunology. The structure of each section helps readers from a range of backgrounds gain important understanding of the subject. Contains tables, pictures, and multimedia features that enhance the learning process In-depth coverage allows readers from a range of backgrounds to benefit from the material Provides handy cross-referencing between articles to improve readability, including easy access from portable devices

The Wild East Barbara Harriss-White 2019-09-23 The Wild East bridges political economy and anthropology to examine a variety of il/legal economic sectors and businesses such as red sanders, coal, fire, oil, sand, air spectrum, land, water, real estate, procurement and industrial labour. The 11 case studies, based across India, Pakistan and Bangladesh, explore how state regulative law is often ignored and/or selectively manipulated. The emerging collective narrative shows the workings of regulated criminal economic systems where criminal formations, politicians, police, judges and bureaucrats are deeply intertwined. By pioneering the field-study of the politicisation of economic crime, and disrupting the wider literature on South Asia's informal economy, The Wild East aims to influence future research agendas through its case for the study of mafia-enterprises and their engagement with governance in South Asia and outside. Its empirical and theoretical contribution to debates about economic crimes in democratic regimes will be of critical value to researchers in Economics, Anthropology, Sociology, Comparative Politics, Political Science and International Relations, Criminologists and Development Studies, as well as to those inside and outside academia interested in current affairs and the relationship between crime, politics and mafia enterprises.

Analysis and Modeling of Gene Regulatory Networks presents a compilation of recent and emerging research topics addressing the design and use of technology in the study and simulation of genomic regulation. Exploring both theoretical and practical topics, this publication is an essential reference source for students, professionals, and researchers working in the fields of genomics, molecular biology, bioinformatics, and drug development.

**India 2039** Harinder S Kohli 2010-01-20 This book paints a bold and inspiring scenario of India becoming an affluent society by 2039, that is, within a generation from now. It makes a persuasive case as to why such a scenario could be plausible. Even more importantly, the book very appropriately and frankly assesses the many hurdles – political, social, policy and institutional – that the country must overcome to realize this vision and lift millions of Indians from relative poverty today to enjoy the fruits of a modern and inclusive affluent society within 30 years or so. Its agenda of inter-generational issues is central to India avoiding the middle income trap that so many other countries have fallen into. However, India can successfully tackle this trap only by addressing, and addressing urgently and head on, the various facets of governance highlighted in the book. Features unique to this study - unlike other vertical studies that treat a topic in depth but on its own, this book tries to connect the dots between the key issues that could decide the future of Indian society - it has a longer 30-year perspective, with a corresponding emphasis on challenges that require long gestation to address - it offers a projection not of what will be but of what India's potential is.

**New Technologies and Work** Arthur Francis 2018-03-26 Originally published in 1989 this book is a valuable contribution to the development of a non-technological approach in the study of technology and work. The studies compare the introduction and implementation of new technology at work in similar enterprises throughout Europe. The contributors share the basic assumption that the impact of technology varies greatly according to the characteristics of the country and its socioeconomic system. They view changes in work as the result of the complex combinations and interactions of such conditions and technology, rather than of technology per se, and their focus is therefore on the mechanisms and processes which come into play when new technology is being introduced. The book's international scope makes it a rich empirical source of comparative material.

*The Complete Idiot's Guide to Team Building* Arthur R. Pell 2003-02-05 The Complete Idiot's Guide to Team-Building shows first-time managers and employees how to work together as a smooth, well-oiled machine. The book shows how to: -- Avoid and manage conflict. Inspire creativity. -- Coax employees to help team members who aren't performing. -- Get everyone to pitch in. -- Gain unprecedented results and make the team enjoy going to work.

**Building Bones: Bone Formation and Development in Anthropology** Christopher J. Percival 2017-02-23 Bone is the tissue most frequently recovered archaeologically and is the material most commonly studied by biological anthropologists, who are interested in how skeletons change shape during growth and across evolutionary time. This volume brings together a range of contemporary studies of bone growth and development to highlight how cross-disciplinary research and new methods can enhance our anthropological understanding of skeletal variation. The novel use of imaging techniques from developmental biology, advanced sequencing methods from genetics, and perspectives from evolutionary developmental biology improve our ability to understand the bases of modern human and primate variation. Animal models can also be used to provide a broad biological perspective to the

systematic study of humans. This volume is a testament to the drive of anthropologists to understand biological and evolutionary processes that underlie changes in bone morphology and illustrates the continued value of incorporating multiple perspectives within anthropological inquiry.

Immunobiology of Carbohydrates Simon Wong 2003-10-31 This book is unique in providing pertinent information on the various established roles carbohydrate play in the immune system and how the innate and adaptive immune systems respond to this type of microbial antigens. The editors selected only topics that have established basic and clinical relevance to this field. The topics from basic research are organised like a textbook, in order to guide the readers through complex sets of events that lead to clearance of or to immune responses toward carbohydrate antigens. The book is clear, concise and contains fully annotated summaries of the key basic and practical information on carbohydrate immunology from current literature. These topics are written by investigators from various disciplines (chemistry, medicine, biochemistry, glycobiology and immunology), creating a fine balance in the point of views presented in the book. It explores the challenges and rewards of understanding the importance of carbohydrates and glycoconjugates in health and disease, applying new knowledge from carbohydrate immunology in improving or developing novel sugar-based therapeutics, and vaccines and medicines. This book is most suitable for glycobiologists and immunologists, but many researchers whose interests, background and expertise are in any of the fifteen topics presented in this book will also find it appealing. It is also a valuable resource for postgraduate students, clinicians or anyone else who is curious about the role of carbohydrates in immunology, and would like to see the topics combined under one cover and in relation to each other.

*Strategic Issues and Challenges in Health Management* K V Ramani 2008-06-10 The Indian health system has a poor global ranking. A new perspective on health system planning and development is required to improve the situation and build a health system responsive to the needs of the country. *Strategic Issues and Challenges in Health Management* addresses these concerns while also highlighting the challenges in delivering efficient and effective health services. The book discusses health sector reforms like financing, Public-Private Partnership (PPP), higher efficiency and cost-effectiveness. It deals with national health programmes, focusing on maternal and child health, infectious diseases, tuberculosis and malaria. The problems of urban health in the context of transition of the demographic and disease pattern in urban areas is also brought to the fore. Critical issues related to health and economic development, future challenges facing health systems, the policy challenges facing the implementation of the PPP approach, the issue of equity in health financing, as well as the roadblocks to efficient establishment of PPP are analysed. The book also deals with restructuring of the health system, while exploring capacity development as a process of health management. Written by well-known academics, health policy makers and health managers, this volume shall be of interest to health professionals, students and scholars of health economics, as well as those working in the areas of health and strategic management.

New Scientist 1959-06-11 New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture.
